FOREWORD

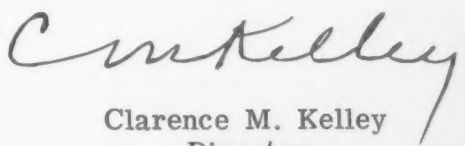
Crime is one of the gravest social problems of our time. It strikes at the very heart of social organization by breeding fear, distrust, and uncertainty. The full extent of lawlessness is not known, but that which comes to the attention of the police and that which is personally experienced and perceived indisputably threaten the well-being of us all in every aspect of our daily lives.

The Uniform Crime Reporting Program is an attempt to measure, meaningfully, the occurrence of crime in the United States. While the Program is designed for use by the law enforcement profession, it has also become a yardstick for a public evaluation of the relative levels of criminal activity prevailing in the Nation.

Although the Program is not a perfect benchmark for gauging crime at a particular place and time, it does represent a valid approach toward this assessment. Furthermore, it is a disciplined effort with more than 46 years of experience which enhances the orderliness so fundamental to sound data collection.

Essentially, the Program collects as much data concerning the occurrence of certain root or Index offenses as are known to the overwhelming majority of United States law enforcement agencies. It then estimates the probable total volume of these offenses had there been complete reporting of them throughout the Nation. Having all law enforcement agencies in the United States participating fully in the Program would, of course, make unnecessary any estimation process. However, the complex and independent structure of the Nation's law enforcement network has made this goal elusive even to a program of the size and duration of the Uniform Crime Reports. With the development of subsidiary state Uniform Crime Reporting Programs, intended for each of the 50 states, the complete, nationwide collection of offenses known to law enforcement nears fulfillment.

Whatever are the uses or whoever are the users of criminal justice data, the Uniform Crime Reports provide the only comprehensive, periodic accounting available of reported and discovered crime in the United States. Accordingly, they can serve constructively to organize public opinion against lawlessness and marshal our resources to combat crime.



Clarence M. Kelley
Director

Crime Factors

Crime is a social problem and the concern of the entire community. The law enforcement effort is limited to factors within its control.

Uniform Crime Reports gives a nationwide view of crime based on police statistics contributed by local law enforcement agencies. The factors which cause crime are many and vary from place to place throughout the country. The reader of this publication is cautioned against comparing statistical information of individual communities solely based on a similarity in their population counts. Population is only one of many factors which must be considered in a comparative study of crime. Some of the conditions which affect the volume and type of crime that occurs from place to place are briefly outlined as follows:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, and race.

Economic status and mores of the population.

Stability of population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Effective strength of the police force.

Standards of appointments to the local police force.

Policies of the prosecuting officials.

Attitudes and policies of the courts and corrections.

Relationships and attitudes of law enforcement and the community.

Administrative and investigative efficiency of law enforcement, including degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

SECTION I

SUMMARY

UNIFORM CRIME REPORTING PROGRAM

Within the framework of the Uniform Crime Reporting Program, the Federal Bureau of Investigation (FBI) serves as a national clearinghouse for the crime statistics of over 13,000 law enforcement agencies. The contributing agencies are responsible for compiling and submitting their crime reports to the FBI, either directly or through their state Program.

As of 1976, the law enforcement agencies active in the Uniform Crime Reporting Program represented 98 percent of the United States' population living in the Standard Metropolitan Statistical Areas, 94 percent of the population in other cities, and 89 percent of the rural population. The combined coverage accounts for 96 percent of the total national population, as estimated by the Bureau of the Census.

Accordingly, the Uniform Crime Reports provide a periodic, nationwide assessment of crime not available elsewhere in the criminal justice system.

Historical Background

The Uniform Crime Reporting Program is the outgrowth of a need for a national and uniform compilation of law enforcement statistics. A voluntary national Program of collecting crime counts was initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). In that same year, the FBI was authorized by the Congress of the United States to serve as the national clearinghouse for statistical information on crime.

Crime reports are obtained from law enforcement agencies throughout the Nation based on uniform classifications and procedures of reporting. Information regarding crime is readily available to law enforcement for offenses, arrests, and the value of stolen and recovered property. To a much lesser degree, data concerning prosecutions, convictions, and confinements are obtained by law enforcement agencies in cooperation with other elements of the criminal justice system.

In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that became known to police. Greater numbers of these data were available than in any other category of reportable crime information. A meaningful overview of crime was available through examination of seven offenses which were selected because of their seriousness, frequency of occurrence, and likelihood of being reported to police. These offenses, known as the Crime Index offenses, are murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

To provide for uniformity nationwide in the reporting of these offenses, standardized definitions were adopted. This standardization was necessary to overcome the variations in definitions of criminal offenses in the states and localities throughout the country. Reporting agencies are required to interpret local criminal acts and law violations in the context of these definitions prior to submission of their counts to the FBI. The Uniform Crime Reporting definitions of these offenses are set forth elsewhere in this publication. Because of the variance in punishment for the same offenses among the state codes, there is no possibility in a program such as this to distinguish between felony or misdemeanor crimes.

The Committee on Uniform Crime Records, IACP, continues to serve in an advisory capacity to the FBI concerning the operation of this Program. In this connection, the IACP plays an active and effective part in quality control through surveys of police records and crime reporting systems. Additionally, the Program employs professional statistical analysts whose responsibilities include the development and perfection of logical procedures to authenticate the crime estimation effort.

The National Sheriffs' Association (NSA) in June 1966, established a Committee on Uniform Crime Reporting to serve in an advisory capacity to the NSA membership and the national Uniform Crime Reporting Program. This Committee actively encourages sheriffs throughout the country to fully participate in this important Program.

Committees on Uniform Crime Reporting within state law enforcement associations are active in promoting interest in the Uniform Crime Reporting Program, fostering widespread and more intelligent use of uniform crime statistics, and lending assistance to contributors when the need exists.

The FBI continues to actively assist individual states in the development of statewide programs of police statistics compatible with the national Program. These state statistical programs provide the advantage of increased coverage of law enforcement agencies due to state mandatory reporting requirements. The state systems also can provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state data collection agency, information is more readily available for the use of the state. The collection and reporting machinery for the national Program also is streamlined substantially.

With the development of state Uniform Crime Reporting Programs, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Completed information from these agencies is forwarded to the national Program through the state Uniform Crime Reporting collection agency. There are 41 states presently operating Uniform Crime Reporting Programs. Additionally, other states are in various stages of developing their own Uniform Crime Reporting Programs. The conditions under which these systems are developed provide for consistency and comparability in the data submitted to the national Program. They also permit regular and timely reporting of the national crime data. These conditions are:

(1) The State Program must conform to the national Uniform Crime Reports standards, definitions, and information required. These requirements, of course, do not prohibit the state from collecting other statistical data beyond the national collection. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports publication deadlines. Additionally, the FBI will continue its internal procedures of editing and reviewing individual agency reports for both completeness and quality; will continue to have direct contact with individual contributors within the state where necessary in connection with crime reporting matters, but will coordinate such contacts with the state agency; and upon request, will continue its training programs within the state with respect to police records and crime reporting procedures. For mutual benefit, these training sessions will be coordinated with the state agency. Should circumstances develop whereby the state agency cannot provide the data required by the national Program, the FBI will reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Objective of Uniform Crime Reporting

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics on a national basis for use in law enforcement administration, operation, and management. These statistics are also intended for the use and information of other criminal justice professionals, legislators, and scholars who have an interest in the crime problem. At the same time, this information is important as a reference source for the public as an indicator of the level of criminality in our society.

Reporting Procedures

Law enforcement agencies (police, sheriffs, and state police) report the number of offenses that become known to them, on a monthly basis, in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, and motor vehicle theft. This count is taken from a record of all complaints of crime received

by the law enforcement agency from victims or other sources, and/or that discovered by officers. These crimes are the Part I offenses in the Program. The Part II offenses, for which only data concerning persons arrested and charged are collected, encompass all other crimes.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in the Part I, Crime Index categories is reported to the FBI whether or not anyone is arrested for the crime, the stolen property is recovered, or prosecution is undertaken. Law enforcement agencies, on a monthly basis, report the total number of these crimes which they clear, either by arrest or exceptional means. A separate count of Index crimes cleared which involve the arrest of offenders under the age of 18 is shown. The value of property stolen and recovered during the month is also reported for Index Crimes.

Arrests are reported monthly for both Part I and Part II offenses, excluding traffic violations, by crime category and include age, sex, and race of each person arrested. Also, a report is submitted on an annual basis, by crime classification, concerning the number of persons formally charged and the disposition of such charges.

The number of law enforcement officers assaulted or killed by type of duty assignment, type of weapon used, the circumstances of the assault, and whether the victim officer sustained injury is collected monthly. Other law enforcement employee data, specifically encompassing the number of full-time sworn officers and other personnel, are reported annually. This information is collected as of October 31 of each calendar year.

Although the responsibility of compiling and submitting crime reports rests on the individual police agency, the FBI endeavors to maintain data validity by providing training seminars and instructional materials in Uniform Crime Reporting procedures. All contributing agencies are supplied with the Uniform Crime Reporting Handbook which outlines, in detail, procedures for classifying and scoring offenses. The Handbook illustrates and discusses the monthly and annual reporting forms, as well as the tally forms which facilitate the periodic tabulation of data.

The Handbook is not the sole method to insure data quality. The FBI schedules Uniform Crime Reporting seminars and workshops throughout the country for law enforcement personnel. FBI personnel are utilized to enlist the cooperation of new contributors and to explain the purpose of this Program and the methods of assembling information for reporting. When reporting problems exist in the individual agencies and remedial efforts through correspondence do not help, FBI Headquarters personnel may be directed to visit the contributor to aid them in resolving their problems.

A good record system is an essential base for accurate crime reporting. The FBI makes available, upon request, to any law enforcement agency the Manual of Police Records, which can serve as a guide in the establishment or modification of a sound police record system.

To enhance communication among Program participants, the publication of the Uniform Crime Reporting "Newsletter" was initiated. This "Newsletter" is utilized to explain revisions in the Program, as well as to present information and instructional material to assist contributors.

Editing Procedures

When the individual reports are submitted to the FBI, data reliability continues as a primary concern. Issuing instructions and conducting training seminars do not complete the role of the FBI. Each incoming report is examined not only for arithmetical accuracy but also, as a possible indication of error, for deviations from the experiences of similar agencies.

Variations in reported crime levels and ratios established by previous reports, may indicate possible incompleteness in reporting or changes in reporting procedures. Necessary arithmetic adjustments or unusual variations are brought to the attention of the submitting agency by correspondence. Correspondence with contributors and state Uniform Crime Reporting Programs is the principal tool for supervision of quality. Not only are individual reports studied, but also, periodic trends for individual reporting units are prepared. As a standard procedure, crime trends for each reporting agency are analyzed five times a year by the FBI. Any significant increase or decrease is made the subject of a special inquiry to the contributing agency. In 1976, for example, approximately 4,300 contributing agencies were queried as to the reason for significant increases or decreases in pertinent crime classifications. The communications containing this inquiry specifically directs attention to possible changes in records or reporting procedures. When it is found

that crime reporting procedures are in part responsible for the difference in the level of crime, the figures for specific crime categories or totals are excluded from the trend tabulations.

Variations from desired reporting standards which cannot be resolved are brought to the attention of the Committee on Uniform Crime Records of the IACP. The Committee may designate a representative to make a personal visit to the agency to cooperatively assist in a needed authentication of records and reporting methods.

Regardless of the extent of the statistical editing processes used by the FBI, the accuracy of the data assembled under this Program depends primarily on the efforts exerted by each contributor to meet the necessary standards of reporting. For this reason, the FBI is not in a position to vouch for the validity of individual agency reports.

Reporting Area

Presentation of crime data by areas, as used in this publication, follows as closely as practical the definitions used by the Office of Management and Budget and the Bureau of the Census for Standard Metropolitan Statistical Areas and other cities. There is, however, some deviation insofar as the rural area is concerned. For crime reporting purposes, rural is generally the unincorporated portion of a county outside of Standard Metropolitan Statistical Areas. In addition, statistics are presented in certain tables relative to "suburban" areas. A suburban area consists of cities with population less than 50,000 together with counties which are within a Standard Metropolitan Statistical Area. In this use of suburban, the major core city is, of course, excluded. The suburban area concept is used because of the particular crime conditions which exist in these communities surrounding the major core cities.

A Standard Metropolitan Statistical Area, generally, is made up of a core city with a population of 50,000 or more inhabitants and the surrounding county or counties which share certain metropolitan characteristics. In New England, "town" instead of "county" is used to describe Standard Metropolitan Statistical Areas. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic areas in New England are used in these areas' tabulations since they encompass an entire county or counties. Standard Metropolitan Statistical Areas, as used in this publication, make up approximately 73 percent of the total United States' population.

"Other cities" are urban places outside Standard Metropolitan Statistical Areas. Most of these places are incorporated and comprise 12 percent of the 1976 population. Rural areas are made up of the unincorporated portions of counties outside of urban places and Standard Metropolitan Statistical Areas and represent 15 percent of our national population. As a general rule, sheriffs, county police, and many state police report on crimes committed within the limits of the counties but outside cities, while local police report on crime committed within the city limits (urban places).

The Crime Totals

Communities not represented by crime reports are relatively few. An examination of the tables found in this document show 1976 crime totals for the Index classifications and the extent of coverage of the data for a particular table. The FBI conducts a continuing program to further reduce the unreported areas. The continuing development and implementation of mandatory state Uniform Crime Reporting Programs, hopefully, will eliminate unreported areas.

Offense Estimation

Due to the voluntary nature of the Uniform Crime Reporting Program, it is possible that a police agency would submit fewer than the required twelve months of offense reports. Tables one through five of this publication represent total crime in the United States; therefore, offense counts here are estimated for agencies which fail to submit complete reports for the year. Offense estimation occurs within each of three areas: Standard Metropolitan Statistical Areas, other cities, and rural areas. It is assumed that the unreported portion of these areas has the same proportionate crime experience as that for which reports were received. Estimates for unreported areas are based on the reported crime experience of similar areas within a state.

Crime Trends

Crime data for trends are homogeneous to the extent that figures from same reporting units, on the basis of population, are used for each of the periods tabulated. In all trend tabulations, only those reporting units are used which have provided comparable data for the period under

consideration. National, geographic, and area trends are always established on the basis of two consecutive years. Exclusions from trend computations are made when figures from a reporting unit are obviously inaccurate for any period or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures.

Year-to-year trends in Uniform Crime Reports are valid and may be used to reasonably establish long-term trends, as well as to reestimate crime volume and reconstruct crime trends for prior years. It can be assumed, logically, that the current year is the most complete in terms of volume. Trend or percent change as established by comparable units for each two-year period is then applied as the basis for reestimating the volume of crime for prior years.

On the other hand, crime rate tables by state and Standard Metropolitan Statistical Area contain the most reliable reports available for the current year, and care should be exercised in any direct comparisions with prior issues. Changes in crime level may have been due in part to improved reporting or records procedures.

Population Data

In computing crime rates by state, geographic division, Standard Metropolitan Statistical Area, and the Nation, population estimates released by the Bureau of the Census on July 1, 1976, were used. Population estimates for individual cities and counties were prepared using special census reports, state sources and estimates, commercial sources, and extrapolation where no other estimate was available. Complete 1976 population estimates for individual cities and counties were used from 15 states, while official sources in other states provided limited data which were used selectively. The estimated United States population increase in 1976 was 1 percent over 1975 according to the figures published by the Bureau of the Census.

Recent Developments in Uniform Crime Reporting

During 1974, the Uniform Crime Records Committee of the IACP and the Committee on Uniform Crime Reporting of the NSA decided to expand the collection of arrest data for narcotic drug violations. After considerable research into the collection of these data, the Committees decided to discontinue the use of the term Narcotic Drug Laws to describe these offenses and replace it with Drug Abuse Violations. The collection format was expanded to include the gathering of data on Drug Abuse Violations for the act of possession, as well as the sale and manufacture of drugs, in violation of the law. The subcategories of Opium or Cocaine, Marijuana, Synthetic Narcotics, and Other Dangerous Non-Narcotic Drugs continue in use with this revised collection format, which became effective in January 1976.

Another format change, effective in January 1976, concerned the expanded collection of offender data relating to Murder and Nonnegligent Manslaughter offenses. Under the expanded format, data are gathered on the age, sex, and race of the offender, along with the relationship of the victim to the offender. Supplementary homicide data continue to be collected on the age, sex, and race of the victim, the weapon used, and a brief statement of the circumstances surrounding the incident.

The third national State Uniform Crime Reporting Conference was held on May 31–June 3, 1977, at the FBI Academy at Quantico, Virginia. Attending the Conference were representatives from all state Uniform Crime Reporting Programs; from law enforcement agencies developing state Programs within their respective states; and members of the Committee on Uniform Crime Records of the IACP and the Uniform Crime Reporting Committee of the NSA. Regional Directors of the Law Enforcement Assistance Administration and representatives of IACP Headquarters were also in attendance. A resolution adopted by the joint meeting of the IACP and NSA Committees will discontinue the collection of disposition data on persons charged following the submission of 1977 Uniform Crime Reports. This does not preclude, however, the continued collection of disposition data by any agency wishing to do so.

The joint IACP–NSA Committee membership concluded that the present collection of disposition data is inadequate. It recommended that a study be instituted to develop a more complete and efficient manner for the collection of disposition data.

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder is defined in the Uniform Crime Reporting Program as the willful killing of another. The classification of this offense, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

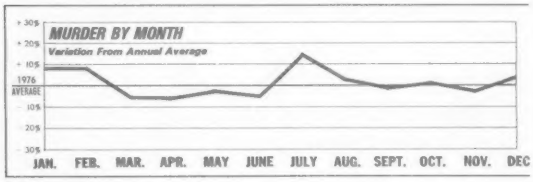
Volume

In 1976, there were an estimated 18,780 murders committed in the United States. This number of murders is approximately 2 percent of the total violent crimes.

An analysis of murder by month in 1976 shows that July had the greatest frequency of murder as compared to any other month of the year.

A geographic breakdown of murder by region showed 42 percent of the murders occurred in the Southern States, 23 percent in the North Central States, 18 percent in the Northeastern States, and 17 percent in the Western States.



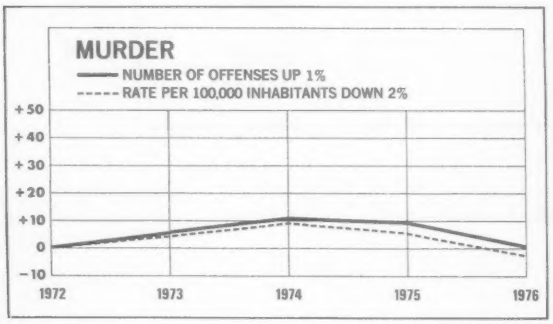
Trend

The number of murders decreased 8 percent from 1975 to 1976.

Regionally, the number of murder offenses in 1976 decreased 10 percent in the Southern States, 9 percent in the North Central States, 8 percent in the Northeastern States, and 5 percent in the Western States.

Large core cities of 250,000 or more inhabitants had a 10 percent decrease in the number of murders in 1976 while the suburban and rural areas experienced decreases of 11 percent each.

The following chart reveals an increase of 1 percent from 1972 to 1976 in the murder counts.



Rate

In 1976, there were 8.8 victims of murder for every 100,000 inhabitants in the Nation. This was a decrease of 8 percent from the murder rate of 9.6 per 100,000 inhabitants recorded in 1975.

The metropolitan areas reported a murder rate of 10 victims per 100,000 inhabitants, the rural areas a rate of 8 per 100,000 inhabitants, and cities outside metropolitan areas reported a murder rate of 5 per 100,000 inhabitants.

The number of murder victims in proportion to population was highest in the Southern States with 11.3 murders per 100,000 inhabitants. This is a decrease of 11 percent from the murder rate of that Region in 1975. In 1976, the Western States showed a murder rate of 8.5, a decrease of 6 percent from 1975. The North Central States had a rate of 7.4 which was a 9 percent decrease for those states. The Northeastern Region had a rate of 7.0, a decrease of 8 percent when compared to the 1975 rate.

Nature

The law enforcement agencies which participate in Uniform Crime Reporting cooperate in providing additional information regarding homicide so that a more in-depth analysis of this offense can be made. Through a supplemental reporting system information is provided regarding the age, sex, and race of the victim and offender; the weapon used in the murder; the circumstances surrounding the offense; and the relationship between the victim and offender.

The victims of murder in 1976 were male in approximately three out of four instances. This ratio of male to female victims is similar to the experience in the last several years. Approximately 51 out of 100 murder victims were white, 47 were Negro, and 2 percent were other races. Three of every ten murder victims were 20 through 29 years of age.

The victim and offender were identified in 10,847 cases during 1976, where there were a single victim and a single offender. A study of these situations reveals that of 4,997 white victims, 4,454 were murdered by white offenders and of 5,628 Negro victims, 5,412 were murdered by people of the same race.

The offender could not be identified in 3,596 of the murders and in the remainder of the murders there was a multiple situation with more than one victim/offender.

Single Victim/Offender by Sex and Race, 1976

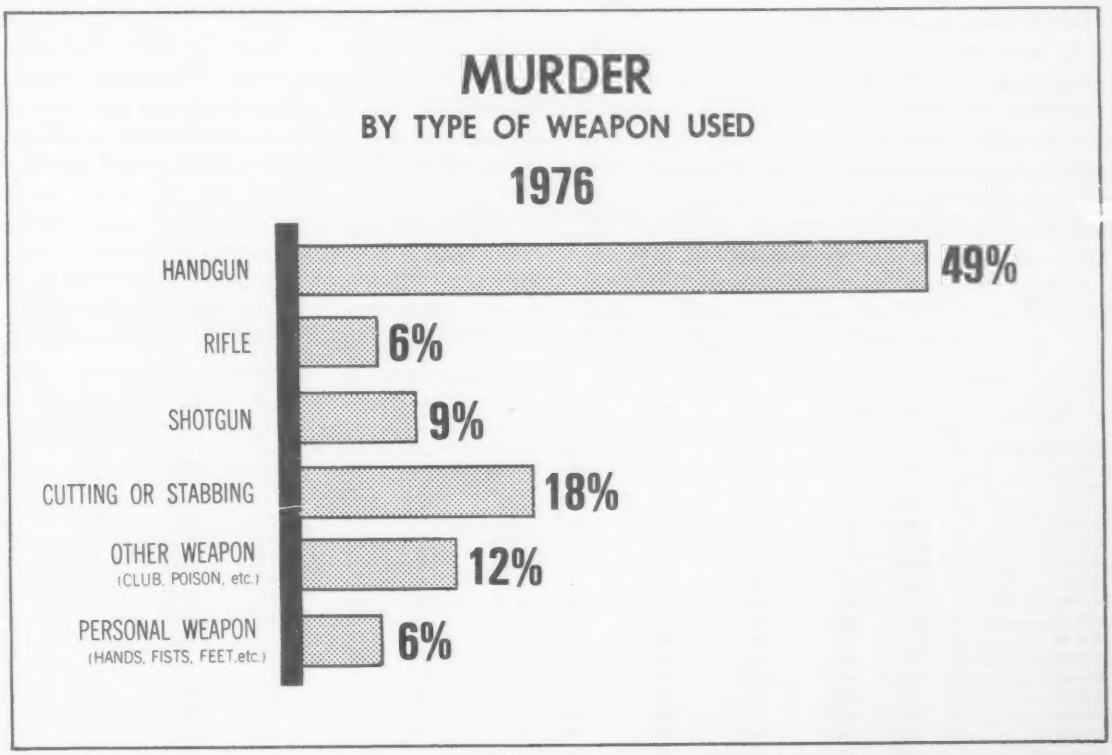
Victim	Total	Offender				
		Sex		Race		
		Male	Female	White	Negro	Other
Sex:						
Male	8,190	6,432	1,758	3,442	4,583	165
Female	2,657	2,385	272	1,262	1,329	66
Race:						
White	4,997	4,311	686	4,454	473	70
Negro	5,628	4,312	1,316	199	5,412	17
Other	222	194	28	51	27	144
Total	10,847	8,817	2,030	4,704	5,912	231

In 1976, firearms again predominated as the weapon most often used in homicide in the Nation. The accompanying chart illustrates a breakdown by type of weapon used in the commission of murder in the Nation. Firearms were used more frequently in the Southern States than in any other region with firearms used in more than seven of every ten murders. Nationwide, 64 percent of the homicides were committed through the use of firearms and 49 percent were committed with handguns. In 1975, 51 percent of the murders were through the use of handguns.

Cutting or stabbing weapons were used in 18 percent of the murders in the Nation. The Northeastern States reported the greatest use of knives or cutting instruments with one out of four murders being committed with this type of weapon. The North Central and Southern States had the least incidence of use of this type of weapon with less than two out of every ten murders. Other weapons such as blunt objects, poisons, explosives, arson, drowning, etc. were used in 12 percent of the murders. In the remaining 6 percent of the murders, personal weapons such as hands, fists, and feet were used.

A comparative study for the past five years shows a decrease from 66 percent of all homicides through use of firearms in 1972 to 64 percent of all homicides in 1976. A comparative analysis of weapons used to commit murder for 1972 through 1976 is shown in tabular form.

The activities resulting in murder vary from arguments to felonies. Murder is largely a societal problem beyond the control of law enforcement.



Murder, Type of Weapon Used, 1976

[Percent distribution]

Region	Total all weapons used	Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons
Northeastern States	100.0	49.2	25.0	10.0	15.8
North Central States	100.0	66.4	15.1	13.3	5.2
Southern States	100.0	71.2	15.2	9.3	4.3

Total	100.0	63.8	17.8	12.2	6.2

Murder, Type of Weapon Used, 1972–1976

[Percent distribution]

Year	Total		Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons
	Number	Percent				
1972	18,670	100.0	66.2	19.0	6.6	8.2
1973	19,640	100.0	67.0	17.8	6.6	8.6
1974	20,710	100.0	67.9	17.6	6.8	7.7
1975	20,510	100.0	65.8	17.7	7.5	9.0
1976	18,780	100.0	63.8	17.8	12.2	6.2

The relationship of the murder victim to the offender emphasizes this point.

In 1976, 27 percent of the murder victims were related to the offenders and 54 percent were otherwise acquainted. During 1976, 6 percent of the murders resulted from drunken arguments and 4 percent resulted from arguments over money or property while 62 percent of the murders resulted from other arguments.

Felonious activities resulted in 20 percent of the murders and 8 percent were caused by suspected felonious activities. An analysis of the known felony-type murders reveal that 42 percent resulted from robbery offenses. Prostitution, commercialized vice, forcible rape, and other sex offenses accounted for 8 percent of the total.

Relationship by Circumstance, 1976

[1] Because of rounding the percentages may not add to total.

involved in 5 percent of the willful killings solved by police.

Since 1972, the clearance rate, nationwide, in homicide has decreased from 82 per 100 offenses to 79 per 100 offenses in 1976.

Persons Arrested

Based on reports submitted by law enforcement agencies, 9 percent of all persons arrested for murder were under 18 years of age and 43 percent were under 25. During the period 1972–1976, there was a 27 percent decrease in the number of persons under 18 years of age arrested for murder. The adult arrests increased 13 percent for murder offenses during this period. Numerically, the 18 to 22 year age group had the heaviest involvement during 1976 with 24 percent of the total arrests coming from within this age group. Negroes made up 53 percent of the arrests for murder in 1976.

Persons Charged

Law enforcement agencies' reports disclose that 71 percent of all adults arrested for murder in 1976 were prosecuted during the year. Forty-eight percent of the adults prosecuted were found guilty as charged, and 14 percent were convicted on some lesser charge. The remaining won release by acquittal or dismissal of the charges against them. Of all individuals processed for murder, 7 percent were juveniles who had their cases referred to juvenile court jurisdiction.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is the unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

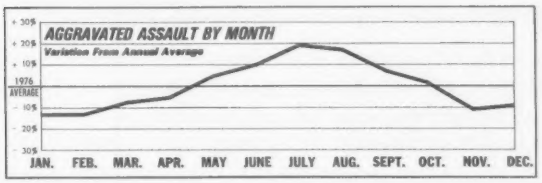
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1975	*484,710*	*227.4*
1976	*490,850*	*228.7*
Percent change	+1.3	+.6

FEATURES

Most frequent month	July
Most frequent weapon	Hands, fists, feet
Most frequent offender:	
Age group	19
Sex	Male
Race	White

Volume

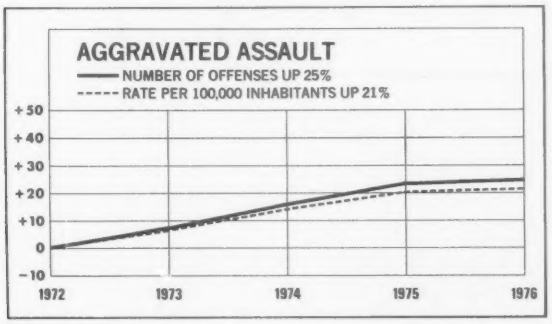
In calendar year 1976, there were an estimated 490,850 aggravated assaults in the Nation. This crime against the person made up 4 percent of the Crime Index offenses in 1976 and comprised 50 percent of the crimes of violence. Regionally, the Southern States reported 35 percent of the total count of these crimes followed by the Western States with 23 percent, and the North Central and Northeastern States, each with 21 percent. As has been the experience in previous years, the summer months recorded the highest frequency of aggravated assault during 1976.



Trend

In 1976, the volume of aggravated assault offenses increased 1 percent over 1975 and 25 percent over 1972. Cities with over 250,000 inhabitants had a decrease of 1 percent. The suburban areas reported an increase of 2 percent and the rural areas a decrease of 3 percent.

The Western States had an increase of 5 percent, the Northeastern States an increase of 1 percent, while the Southern States reported no change. The North Central States had a decrease of 1 percent.



Rate

For each 100,000 persons in the United States during 1976, there were 229 victims of aggravated assault. The metropolitan areas had an aggravated assault rate of 255 per 100,000 inhabitants. The cities outside metropolitan areas had a victim rate of 196 per 100,000 inhabitants and the rate for rural areas was 128 per 100,000 inhabitants. The victim rate for the Nation for aggravated assault increased 1 percent over 1975 and 21 percent over 1972.

The Western States were highest with a rate of 294 per 100,000 followed by the Southern States with 252, the Northeastern States with 208, and the North Central States 175.

Nature

In 1976, 24 percent of the serious assaults were committed with the use of firearms. Knives or other cutting instruments were used in 23 percent of the assaults, 26 percent were committed with blunt objects or other dangerous weapons. The remaining assaults were with personal weapons such as hands, fists, and feet. A comparison of aggravated assault from 1972 to 1976 indicates that firearms as a weapon increased 16 percent; assaults with knives or other cutting instruments rose 12 percent; assaults where blunt objects or other dangerous weapons were used increased 41 percent; and those aggravated assaults through use of personal weapons climbed 32 percent. The table which follows demonstrates the regional experience of aggravated assault in 1976 by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1976

[Percent distribution]

Region	Total all weapons	Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons
Northeastern States	100.0	15.9	27.3	28.5	28.3
North Central States	100.0	26.8	22.7	24.9	25.6
Southern States	100.0	27.6	24.3	24.0	24.1
Western States	100.0	22.1	19.4	27.7	30.8
Total	100.0	23.6	23.5	26.0	26.9

Clearances

Law enforcement agencies were successful in solving 63 of each 100 cases of aggravated assault in 1976. This relatively high solution rate is consistent with high solution rates in other crimes against the person. Persons under 18 years of age were identified in 11 percent of these clearances. Due to the nature of these crimes, arrests are frequently made by personnel of police patrol units who happen upon or are called to the scene of an assault. This type of patrol duty is hazardous to the officers. Since 1967, 164 officers have lost

their lives responding to disturbance-type calls, which frequently involve family or neighborhood arguments.

Persons Arrested

Arrests for aggravated assault in 1976 increased 40 percent over 1972. Since 1972, arrests of persons 18 years of age and over for aggravated assault have increased 40 percent and arrests of persons under 18 years of age for this offense have increased 42 percent. As a group, persons 21 years of age and over accounted for 68 percent of the arrests for aggravated assault in 1976 and those under age 21 accounted for 32 percent. Arrests of males outnumbered females by 7 to 1.

Persons Charged

Seventy out of every 100 adults arrested for aggravated assault in 1976 were prosecuted. Thirteen percent of the adults prosecuted for this offense were convicted of lesser charges. Acquittals and dismissals accounted for 35 percent of the dispositions for all persons charged with aggravated assault. Eighteen percent of all persons processed were referred to juvenile court jurisdictions.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined under this Program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1975	*56,090*	*26.3*
1976	*56,730*	*26.4*
Percent change	+1.1	+.4

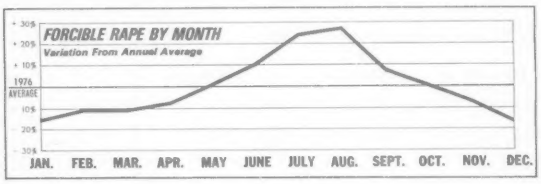
FEATURES

Most frequent month	August
Most frequent offender:	
Age group	16–20
Race	White

Volume

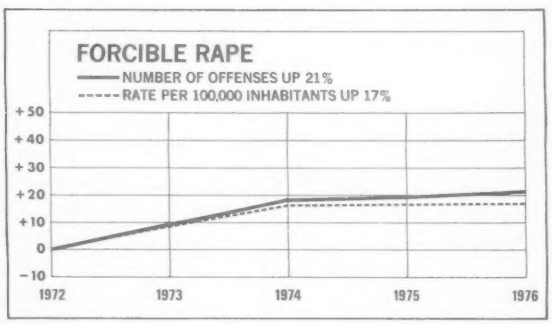
During 1976, there was an estimated total of 56,730 forcible rapes. Forcible rape continues, as in prior years, to comprise less than 1 percent of the Crime Index total. It makes up 6 percent of the volume of crimes of violence. When viewed geographically, the Southern States recorded 32 percent of the total volume, the Western States reported 26 percent, the North Central States reported 24 percent and the Northeastern States reported 18 percent of the forcible rapes.

The following chart indicates that more rapes occur in the summer months of the year.



Trend

The volume of forcible rape offenses in 1976 increased 1 percent over 1975, and 21 percent over 1972. During 1976, this crime occurred most frequently in large cities with 250,000 or more inhabitants, which accounted for 41 percent of the forcible rapes. Forcible rape decreased 3 percent in this group and increased 1 percent in the suburban areas surrounding the large core cities. The rural areas registered a 2 percent increase over 1975. Geographically, the Western States reported an increase of 5 percent, followed by the Southern States with an increase of 3 percent. The Northeastern and North Central States reported decreases of 3 percent.



Rate

A crime rate, in its proper perspective, is a victim risk rate since it equates the number of crimes per unit of population. In 1976, 52 out of every 100,000 females in this country were reported rape victims. Since 1972, the forcible rape rate has increased 17 percent. In calendar year 1976, the forcible rape rate increased less than one percent over 1975.

The metropolitan areas experienced a risk rate of 61 victims per 100,000 females. Cities outside metropolitan areas experienced a risk rate of 26 per 100,000 females and the rate in the rural areas was 25 per 100,000 females. Females in the Western States were victims of forcible rape at the rate of 76 per 100,000. In the South this rate was 51 per 100,000, 46 per 100,000 in the North Central States and 40 per 100,000 in the Northeast.

Nature

In 1976, 74 percent of all rape offenses were by force. The remainder were attempts or assaults to commit forcible rape. This offense is a violent crime against the person, and of all the Crime Index offenses, law enforcement administrators recognize that this offense is probably one of the most under-reported crimes due primarily to the fear of victims for their assailants and the sense of embarrassment over the incident. As a national average, 19 percent of all forcible rapes reported to police were determined by investigation to be unfounded. In other words, the police established that no forcible rape offense or attempt to rape had occurred. Crime counts in this publication are limited to actual offenses established by police investigation.

Clearances

Of the total forcible rapes reported in 1976 to law enforcement, 52 percent were cleared by arrest. The large cities with 250,000 or more people reported a 51 percent clearance rate. The suburban areas of the country reported a 53 percent clearance rate while the rural areas had a 69 percent clearance rate. Of the total clearances for forcible rape, 10 percent were by the arrest of persons under the age of 18.

Persons Arrested

The grouping of males 16 to 20 years of age constituted the greatest concentration of arrests for forcible rape in 1976. Total arrests for this offense decreased two percent, while the arrests of persons 18 years of age and over were down one

percent from 1975. Fifty-seven percent of the arrests for forcible rape during the year were of persons under the age of 25. All arrests for forcible rape in 1976 compared to 1972 indicate an increase of 30 percent. Figures for the same years indicate that arrests of persons under 18 years of age have increased 18 percent. In 1976, 51 percent of the persons arrested for forcible rape were whites, 47 percent Negroes, and all other races comprised the remainder.

Persons Charged

Of all adults arrested for forcible rape in 1976, 69 percent were prosecuted for this offense. Acquittals and/or dismissals resulted in 49 percent of these cases. Forty-two percent of the adults prosecuted were found guilty of the substantive offense and 9 percent were convicted of lesser offenses. Juvenile referrals amounted to 20 percent of the persons processed on forcible rape charges in 1976.

ROBBERY

DEFINITION

Robbery is the stealing or taking anything of value from the care, custody, or control of a person, in his presence, by force or by threat of force. Assault to commit robbery and attempts are included. This is a violent crime and frequently results in injury to the victim.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*

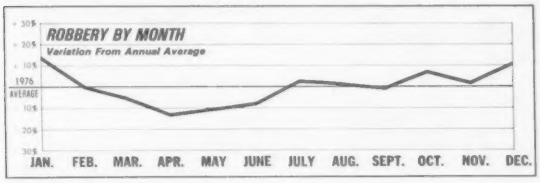
Volume

There was an estimated total of 420,210 robbery offenses committed in the United States in 1976. This offense makes up 4 percent of the total Crime Index and comprises 43 percent of the crimes of violence. In 1976, these offenses occurred most frequently during the month of January.

The heaviest volume of robbery offenses occurred in the Northeastern States with 34 percent of the total. The North Central States experienced 24 percent; the Southern States 23 percent; and the Western States reported the remainder.



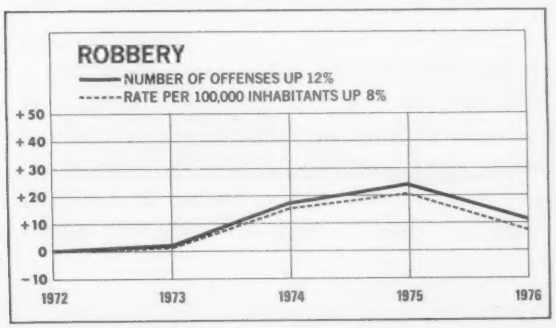
Trend

When the total number of robbery offenses for 1976 is compared with the 1975 total, a 10 percent decrease is noted. Since 1972, however, robberies have increased 12 percent.

Large cities with over 250,000 population, reported an 8 percent decrease in robbery offenses in 1976 when compared to the reported volume in 1975. Suburban areas of the United States had a 13 percent decrease and the rural areas decreased 16 percent.

Geographically, the Western States experienced a 3 percent decrease in robbery offenses in 1976. The Northeastern States had a 4 percent decrease. The Southern and North Central States reported decreases of 16 percent and 15 percent respectively.

The accompanying chart depicts the trend in the volume of robbery and the robbery rate, 1972–1976.



Rate

The 1976 rate of 196 robberies per 100,000 inhabitants was 10 percent below the 1975 rate. Robbery is primarily a large city crime. Seven out of ten robberies in the United States occurred in the cities with more than 100,000 inhabitants. These cities experienced 521 robberies per 100,000 people.

There were 255 robberies per 100,000 inhabitants in the metropolitan areas during 1976. The cities outside metropolitan areas experienced a rate of 51 robbery offenses per 100,000 people. In the rural areas, the robbery rate was 21 per 100,000 inhabitants.

Robbery occurred most frequently in the Northeastern States where the rate was 288 per 100,000 inhabitants. The Western States had a rate of 207, the North Central States 176, and the Southern States 140 per 100,000 people.

Nature

Supplemental robbery information is obtained from law enforcement agencies as a part of the monthly collection of statistical data under this Program. In 1976, these figures disclosed that nearly half of the robberies were committed on the street. Nationally, bank robbery offenses increased from 4,180 offenses in 1975 to 4,565 in 1976. The average bank robbery dollar loss, however, decreased from 4,373 in 1975 to 3,190 in 1976.

As it has been pointed out in prior issues of this publication, the full impact of this violent crime on the victim cannot be completely measured in terms of dollar loss alone. While the object of the attack is money or property, many victims of muggers and the strong-armed robbers, as well as other armed robbers, suffer serious personal injury. During 1976, the average value loss in each robbery incident was $338 for a total reported loss of $142 million.

The 1972–1976 trends in robbery by type, as illustrated by the following charts, show bank robbery has increased 74 percent. During this same period, gas or service station holdups have increased 11 percent; chain store robberies increased 50 percent; and holdups of other commercial or business establishments rose 6 percent. During the 1972–1976 time period, street robberies increased 6 percent and residential robberies increased 16 percent.

In 1976, 43 percent of all robberies were committed through the use of firearms, 13 percent were by the use of knives or cutting instruments

and eight percent by the use of other weapons. The remainder of the reported robberies were strong-arm where no weapons were used.

Clearances

In 1976, law enforcement agencies were successful in clearing 27 percent of the robbery offenses reported. Eighty-four percent of the robberies which were cleared by arrest involved adults. Of the strong-arm robberies cleared, 26 percent were by the arrest of persons under 18 years of age. In robberies where knives or other cutting instruments were used, persons under the age of 18 were involved in 14 percent of the clearances, 9 percent in those in which firearms were used, and 15 percent in which other dangerous weapons were used.

Persons Arrested

Nationally, arrests for robbery decreased 16 percent in 1976 when compared to 1975. The greatest volume of arrests occurred in cities and decreased 17 percent. In the rural areas, arrests decreased 22 percent and in the suburban areas arrests decreased 16 percent.

Examination of arrest data discloses that 76 percent of the persons arrested for robbery were under 25 years of age and 56 percent were under 21 years of age. Of all persons arrested for robbery, 34 percent were under the age of 18. Robbery arrests for this young-age group recorded a 19 percent decrease in 1976 over 1975.

In 1976, 7 of every 100 persons arrested for robbery were females. Arrests of women for this offense declined 11 percent in 1976 when compared to 1975.

From a standpoint of race, 59 percent of those arrested were Negro, 39 percent were white, and all other races made up the remainder.

Persons Charged

In 1976, 72 percent of all adults arrested for robbery were prosecuted. Thirty-one percent of the persons processed for this crime were juveniles whose cases were referred to juvenile court jurisdictions. Of the adults prosecuted in 1976, 56 percent were convicted of the substantive offense, 8 percent were convicted for lesser charges, and the remainder were acquitted or their cases were dismissed.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify the crime as a burglary. The offense of burglary in this Program is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

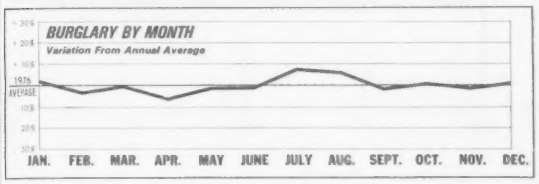
Volume

An estimated total of 3,089,800 burglaries occurred during 1976. In 1976, the large cities over 250,000 inhabitants recorded 31 percent of the total burglary figure.

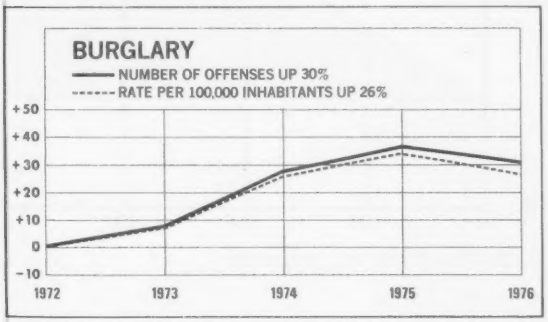
Burglary makes up 27 percent of the total Crime Index offenses. Burglary is found to comprise 30 percent of the total property crimes. Geographically, the Southern States experienced 30 percent of the reported burglaries, the Western States 24 percent, the Northeastern States 23 percent, and the North Central States 22 percent.

Viewed monthly the highest volume of burglary occurred in July of 1976.



Trend

The five-year trend, 1972–1976, indicates burglary offenses have risen 30 percent. In 1976, burglary offenses decreased 5 percent as compared to 1975. Cities over 250,000 population reported a decrease of 4 percent. In 1976, the suburban and rural areas of the Nation reported decreases of 6 and 4 percent, respectively. Viewed regionally, the North Central States reported a 9 percent decrease, the Southern and Western States decreased 8 and 2 percent, respectively. The Northeastern States reported no change.



Rate

In 1976 there were 1,439 burglaries per 100,000 inhabitants. During the period of 1972–1976, this rate increased 26 percent. The burglary rate for 1976 decreased 6 percent when compared with 1975. The metropolitan areas reported a rate of 1,646 burglaries per 100,000 people. The rural areas recorded a rate of 768 offenses per 100,000 inhabitants. The cities outside metropolitan areas had a rate of 1,014 burglaries per 100,000.

The Western States recorded the highest burglary rate in 1976 with 1,962 offenses per 100,000 inhabitants followed by the Northeastern States with a rate of 1,447, the Southern States 1,346, and the North Central States 1,195.

Nature

In 1976, 75 percent of the burglaries involved forcible entry, 18 percent were unlawful entry (without force) and the remainder were forcible entry attempts.

Nonresidential offenses accounted for 37 percent of the total burglaries in 1976; residential burglaries accounted for 63 percent. Daytime burglaries of residences decreased 2 percent in 1976 in comparison to the 1975 experience. Considering the period 1972–1976, there has been an overall increase of 36 percent in the volume of daytime residential burglaries.

Economically, the offense of burglary represents a substantial sum. Victims suffered a loss of $1.4 billion in 1976 through the offense of burglary. During 1976, residential losses amounted to $955 million. In 1975, that loss amounted to $925 million. Nonresidential losses due to burglaries amounted to $432 million in 1976 and $446 million in 1975. In 1976, the average dollar loss per burglary was $449.

Clearances

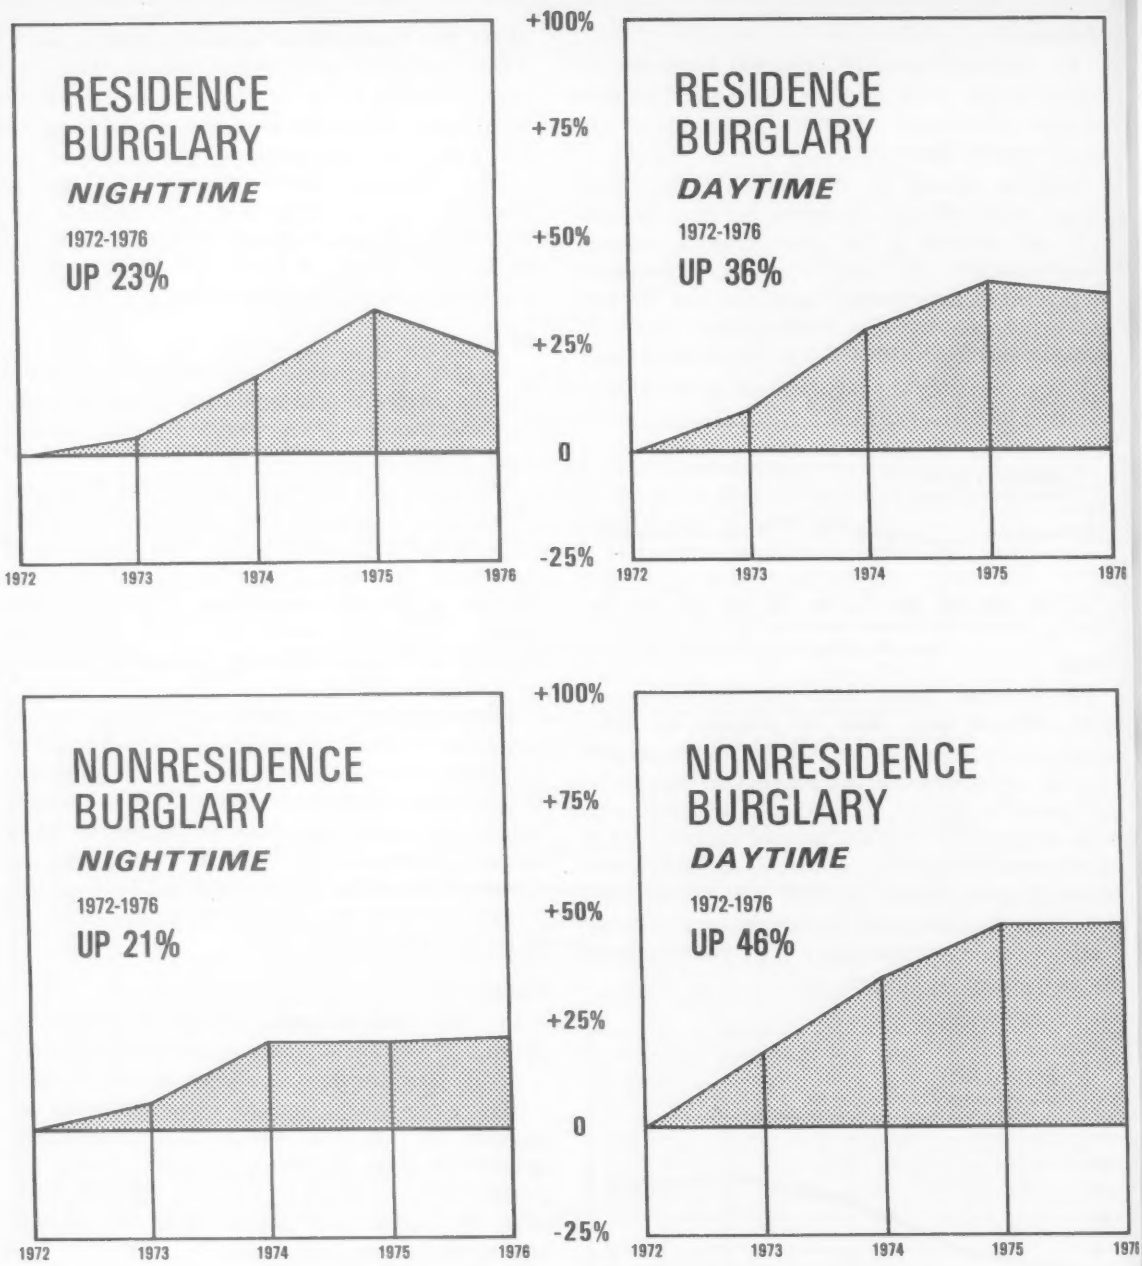
In 1976, law enforcement was successful in clearing 17 percent of the total burglary offenses.

Adults were involved in 67 percent of all cases cleared while young persons under 18 years of age were involved in 33 percent. Law enforcement agencies in cities 250,000 and above cleared 16 percent of these crimes in 1976. In the suburban areas 17 percent were solved while 19 percent were cleared in the rural areas.

Persons Arrested

In this Program, the arrest of one person may account for the clearance of numerous offenses. Likewise, the arrest of several may clear only one offense. In the offense of burglary, it has been the experience of law enforcement that the arrest of one person frequently clears several reported offenses. Total arrests for burglary in 1976, decreased by 10 percent from 1975. Arrests of per-

242-856 O - 77 - 3



BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

sons under the age of 18 declined 11 percent while arrests of persons 18 years and over decreased 10 percent. In the cities and suburban areas, decreases of 11 and 8 percent, respectively, were reported. The rural areas experienced a 15 percent decrease in total arrests for burglary.

In analyzing the 1972–1976 period, a 47 percent increase in burglary arrests is seen. Arrests of individuals under the age of 18 increased 48 percent, while the arrests of adult burglary offenders increased 46 percent.

Nationally, persons under 25 accounted for 84 percent of all arrests for burglary in 1976. Persons under 18 accounted for 51 percent of all arrests for this crime. Females were involved in 5 of every 100 arrests for burglary during 1976. Arrests of whites accounted for 69 percent of all burglary arrests in 1976. Twenty-nine percent of the persons arrested for burglary were Negroes.

Persons Charged

In 1976, 84 percent of the adults arrested for burglary were prosecuted. Of the adults prosecuted, 59 percent were found guilty as charged. Eleven percent of those charged with burglary were convicted of a lesser offense and 30 percent were freed through acquittal or dismissal of the charges. Juveniles referred to juvenile court jurisdiction accounted for 54 percent of all persons processed for burglary in 1976.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking or stealing of property or articles without the use of force, violence, or fraud. It includes crime such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. In the Uniform Crime Reporting Program this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft, of course, is excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1975	*5,977,700*	*2,804.8*
1976	*6,270,800*	*2,921.3*
Percent change	+4.9	+4.2

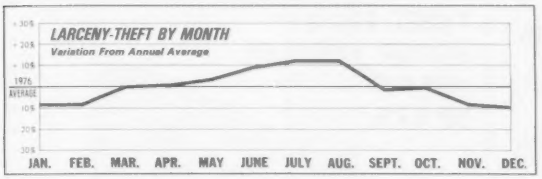
FEATURES

Most frequent month	August
Most frequent offender:	
Age group	13–17
Sex	Male

Volume

In 1976, there were 6,270,800 offenses of larceny-theft reported, which is an increase from 5,977,700 such crimes in 1975. This offense makes up 55 percent of the Crime Index total. From a seasonal standpoint, the volume of larceny–theft was highest during the summer months of 1976.

Geographically, the volume of larceny-theft was highest in the Southern and North Central States which reported 30 and 27 percent respectively, followed by the Western States with 23 percent, and the Northeastern States with the remainder.

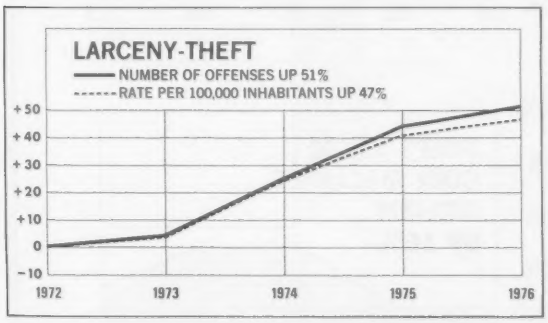


Trend

Larceny-theft increased 5 percent in 1976 when compared to the previous year. The large cities with over 250,000 inhabitants reported an increase of 6 percent in volume. The rural and suburban areas increased 5 and 4 percent, respectively.

Geographically, the Northeastern States reported an increase of 11 percent, the Southern States increased 6 percent, while the Western States increased 3 percent and the North Central States recorded an increase of 1 percent.

Nationwide, this offense has increased 51 percent since 1972.



Rate

During 1976, there were 2,921 larceny-thefts per 100,000 inhabitants, an increase of 4 percent over the 1975 rate. The rate has increased 47 percent since 1972. In 1976, the larceny-theft rate in the metropolitan areas was 3,323 per 100,000 inhabitants, 2,889 per 100,000 inhabitants in cities outside any metropolitan areas and 1,002 in the rural areas. Viewed geographically, the Western States reported the highest larceny-theft rate with 3,740 offenses per 100,000 inhabitants, which was a 1 percent increase over 1975. The North Central States had a rate of 2,944, up 1 percent; the Southern States 2,717, up 5 percent; and the Northeastern States with 2,542 reported an increase of 11 percent in the rate.

Nature

The average value of property stolen in each larceny-theft in 1976 was $184, up from $166 in 1975. When the average value is applied to the estimated crimes in this category, the dollar loss to victims is $1.2 billion. It is true that a portion of the goods stolen was recovered and returned to victims, but the relatively low percentage of these crimes cleared by arrest and the lack of specific identification characteristics on such property indicate these recoveries did not materially reduce the overall loss. In addition many offenses in this category, particularly where the value of the stolen goods is small, never come to police attention.

In 1976, the average value of goods and property reported stolen from victims of pickpockets was $135, by pursesnatchers $92, by shoplifters $39, by thefts from motor vehicles $216, and by miscellaneous thefts from buildings $283.

From year to year, the distribution of larceny-theft as to type of theft remains relatively constant. As in prior years, a major portion of these thefts, 42 percent, represented thefts of motor vehicle parts and accessories and other thefts from motor vehicles. Other major types of thefts which contributed to the large number of these crimes were thefts from buildings with 15 percent and stolen bicycles with 10 percent. Miscellaneous types of larceny-thefts, not falling into any of the specific categories for which data were collected, made up 18 percent of the total. The remainder was distributed among pocket-picking, purse-snatching, shoplifting, and thefts from coin-operated machines. The accompanying table presents the distribution of larceny-theft by type within the geographic regions of the United States.

Total	100.0	100.0	100.0	100.0

Clearances

In 1976, 19 percent of all larceny-theft offenses brought to police attention were solved. Involvement of the young age group is demonstrated by the fact that 33 percent of these crimes which were cleared in the Nation's cities were solved by arrest of persons under 18 years of age. Juvenile clearance figures for suburban areas and rural areas were 35 percent and 22 percent, respectively.

Persons Arrested

Fifty-two percent of the total arrests for Crime Index offenses in 1976 were for larceny-theft. Arrests for this crime decreased 4 percent, 1976 over 1975. Forty-three percent of these arrests were of persons under 18 years of age, and when individuals under 21 were considered, the ratio rose to 60 percent. When examined by sex of arrested persons, it was determined that females comprised 31 percent of all arrests for larceny-theft and that females had a higher involvement in this offense than for any of the other Index offenses. In fact, women were arrested more often for larceny-theft than any other offense in 1976.

Arrests of females for larceny-theft violations declined 2 percent in 1976; while arrests of males decreased 5 percent when compared to 1975 figures. Arrests of whites outnumbered Negroes by more than 2 to 1 with all other races comprising about 2 percent of the arrests for larceny-theft. The total volume of arrests for larceny-theft in 1976 as compared with the 1972 figures indicates a 54 percent increase. Arrests of individuals under 18 were 36 percent greater than 1972. The number of adult arrests rose 70 percent over the number of arrests for this offense in 1972.

Persons Charged

As in prior years, law enforcement agencies nationally charged more offenders for larceny-theft than for any other Crime Index offense. Seventy-three percent of the adults prosecuted for larceny-theft were found guilty of this offense, 5 percent were found guilty of a lesser charge, and the remaining had their cases dismissed or were acquitted. Thirty-seven percent of persons processed in 1976 for larceny-theft were referred to juvenile court jurisdiction.

MOTOR VEHICLE THEFT

DEFINITION

In Uniform Crime Reporting, motor vehicle theft is defined as the unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*

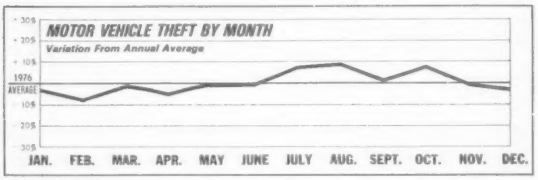
Volume

In 1976, 957,600 motor vehicles were reported stolen to law enforcement. Geographically, the volume of motor vehicle thefts in 1976 was highest in the Northeastern States which reported 33 percent of the total followed by the North Central States with 24 percent. The Southern and the Western States each reported 21 percent. This crime made up 8 percent of all Crime Index offenses. The volume of motor vehicle theft was highest during the month of August.



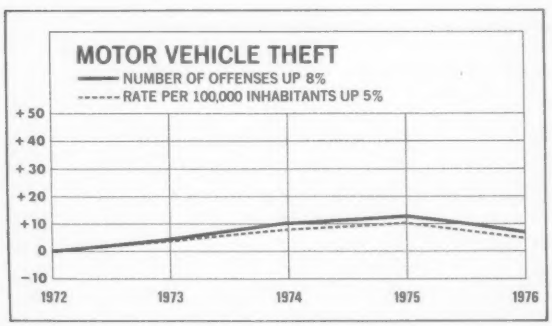
MOTOR VEHICLE THEFT BY MONTH
Variation From Annual Average
1976 AVERAGE
JAN. FEB. MAR. APR. MAY JUNE JULY AUG. SEPT. OCT. NOV. DEC.

Trend

The number of motor vehicle thefts decreased 4 percent from 1975 to 1976.

Motor vehicle thefts decreased 7 percent in large cities with 250,000 or more inhabitants during 1976. The rural areas reported an increase of 3 percent in motor vehicle thefts while the suburban areas had a decrease of 5 percent.

Geographically, motor vehicle thefts were up 1 percent in the Western States. The Southern States reported a decrease of 11 percent, the North Central and the Northeastern States reported decreases of 7 and 1 percent, respectively. The accompanying chart shows that the number of motor vehicle thefts has increased 8 percent since 1972.



Rate

The 1976 motor vehicle theft rate of 446 offenses per 100,000 inhabitants is 5 percent lower than in 1975. Since 1972, the motor vehicle theft rate has risen 5 percent. People in cities with over one million population were deprived more often of their motor vehicles in 1976 than in any other population group with 1,181 thefts per 100,000 inhabitants.

Nationally, the motor vehicle theft rate in the metropolitan areas was 554 per 100,000 inhabitants. The cities outside metropolitan areas had a motor vehicle theft rate of 206, and the rural areas had a rate of 107.

Regionally, the Northeastern States had the highest motor vehicle theft rate in 1976. This rate was 646, a decrease of 1 percent from 1975. The Western States had a rate of 532 per 100,000 inhabitants which was a decrease of 1 percent. The North Central States had a rate of 402 which was 7 percent lower than the prior year and the Southern States reported a decrease of 12 percent in the motor vehicle theft rate of 291 per 100,000 inhabitants.

Across the Nation in 1976, an estimated one of every 139 registered motor vehicles was stolen. Regionally, this rate was the highest in the Northeastern States where 12 motor vehicles per 1,000 registered vehicles were stolen. In the other three regions the figures were 8 in the Western States, 6 in the North Central States, and 5 in the Southern States.

Nature

Motor vehicle theft rates again clearly indicate that this crime is primarily a large city problem since the highest rates appear in the most heavily populated sections of the Nation. In 1976, the average value of stolen motor vehicles was $1,741 at the time of theft.

Of all motor vehicle thefts reported during 1976, 83 percent were automobiles. Eight percent were trucks or buses and 9 percent were other types of motor vehicles.

Clearances

Law enforcement agencies were successful in solving 14 percent of the motor vehicle thefts by arrest of the offender.

In the Nation's largest cities, 11 percent of motor vehicle thefts were cleared during 1976. Throughout the Nation, motor vehicle theft clearance percentages ranged from 25 percent in the South Atlantic States to 8 percent in the New England States.

In all geographic divisions and population groups, the participation of the young-age group population is indicated by the high proportion of these clearances which were through the arrest of persons under 18 years of age. In the largest cities, 26 percent of the motor vehicle thefts cleared were by arrests in this age group while juveniles accounted for 32 percent of the solutions in the suburbs and 28 percent in the rural areas.

Persons Arrested

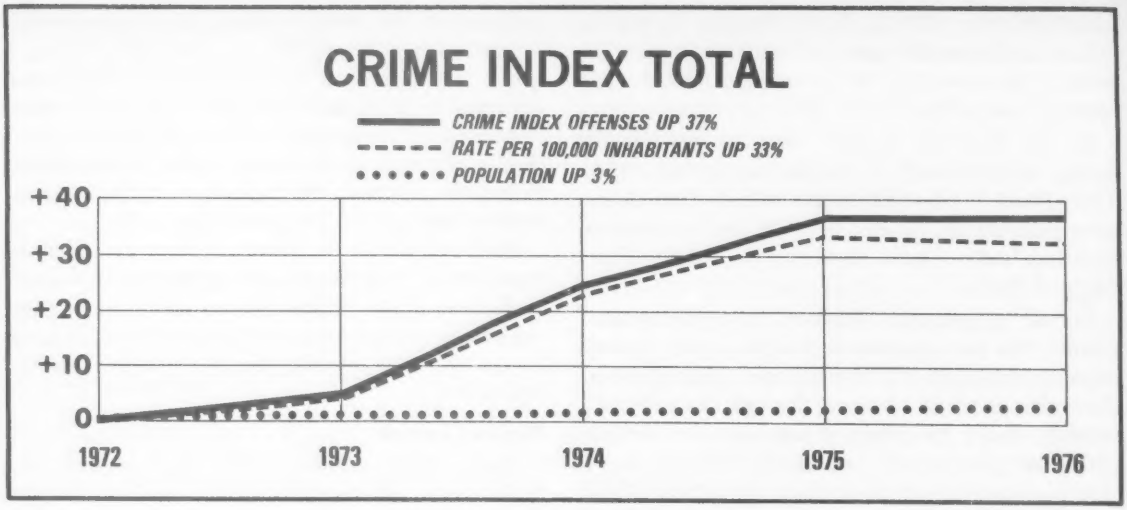
As in prior years, persons arrested for motor vehicle theft came primarily from the young age group segment of the population. In 1976, 53 percent of all persons arrested for this crime were under 18 years of age. When persons under 21 are included in the computations, the proportion of arrests rises to 72 percent.

The national trend in motor vehicle theft arrests disclosed a decrease of 7 percent in 1976 when compared to 1975. Adult arrests decreased 6 percent while arrests of persons under 18 decreased 9 percent. During the period 1972–1976 motor vehicle theft arrests increased 3 percent.

Females under 18 years of age recorded a decrease of 1 percent in arrests for motor vehicle theft from 1975. White persons made up 71 percent of the arrests for motor vehicle theft, Negroes 26 percent, and all other races accounted for the remainder.

Persons Charged

Police reports disclosed that of all persons formally processed for motor vehicle theft in 1976, 64 percent were referred to juvenile court jurisdictions. No other Crime Index offense results in such a high percentage of juvenile court referrals. When the remaining adult offenders were considered as a group, 53 percent of those prosecuted on charges of motor vehicle theft were found guilty as charged, 13 percent were convicted of lesser offenses, and the remainder were either acquitted or their cases were dismissed.



During calendar year 1976, an estimated 11,304,800 Crime Index offenses were reported to law enforcement agencies, an increase of less than one percent over 1975. The violent crime category made up 9 percent of the Crime Index total and decreased 4 percent in volume from 1975. Murder decreased 8 percent, forcible rape and aggravated assault each increased 1 percent, and robbery decreased 10 percent. The voluminous property crimes as a group increased less than 1 percent. Larceny-theft increased 5 percent while burglary and motor vehicle theft decreased 5 and 4 percent, respectively.

Since 1972, the Crime Index offenses as a group have increased 37 percent. The violent crimes increased 18 percent and the property crimes rose 39 percent in volume during this five-year period. The increases during this time span ranged from less than one percent for murder to 51 percent for larceny-theft.

The estimated 1976 crime figures for the United States are set forth in the table titled, "National Crime, Rate, and Percent Change."

Crime rates relate the incidence of reported crime to population. A crime rate is frequently viewed as a victim risk rate. Crime rates used are based on Crime Index offenses.

Many factors influence the nature and extent of crime in a particular community. A number of these factors are shown on page *v* of this publication. A crime rate takes into consideration only the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area.

The following table lists the crime rates for the four geographic regions of the United States.

Crime Rate by Region, 1976

[Rate per 100,000 inhabitants]

Crime index offenses	Northeastern States	North Central States	Southern States	Western States
Total	5,157.7	4,922.9	4,783.4	6,782.8
Violent	523.6	381.7	429.3	548.3
Property	4,634.1	4,541.2	4,354.1	6,234.5
Murder	7.0	7.4	11.3	8.5
Forcible rape	20.4	23.4	26.3	38.9
Robbery	288.1	175.8	139.9	206.8
Aggravated assault	208.1	175.1	251.7	294.1
Burglary	1,446.7	1,195.2	1,346.2	1,962.1
Larceny-theft	2,541.9	2,944.0	2,716.6	3,740.0
Motor vehicle theft	645.5	402.1	291.3	532.4

The table "Crime Rate by Area, 1976" shows the crime experience in metropolitan areas, rural areas and cities and towns outside metropolitan areas.

Crime Rate by Area, 1976

[Rate per 100,000 inhabitants]

Crime index offenses	Total United States	Metropolitan areas	Rural	Other cities
Total	5,266.4	6,073.4	2,047.5	4,374.0
Violent	459.6	550.3	169.8	265.9
Property	4,806.8	5,523.1	1,877.7	4,108.1
Murder	8.8	9.5	7.8	5.3
Forcible rape	26.4	31.3	13.0	13.4
Robbery	195.8	254.9	21.2	51.0
Aggravated assault	228.7	254.7	127.9	196.2
Burglary	1,439.4	1,645.9	768.1	1,013.8
Larceny-theft	2,921.3	3,322.8	1,002.3	2,888.5
Motor vehicle theft	446.1	554.4	107.3	205.8

This table indicates the higher crime rates in the cities, particularly in the metropolitan areas.

Crime Index Tabulations

The following tabulations are shown to indicate the probable extent, fluctuation and distribution of crime for the United States as a whole; geographic divisions; individual states; standard metropolitan statistical areas; and cities, towns, and counties. The measure used is a Crime Index consisting of seven important offenses which are counted as they become known to the law enforcement agencies. Crime classifications used in the Index are: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary-breaking or entering, larceny-theft, and motor vehicle theft.

The total number of criminal acts that occur is unknown, but those that are reported to law enforcement provide the first means of a count. Not all crimes come readily to the attention of law enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish an abbreviated and convenient measure of the crime problem.

It is important to remember in reviewing the tables that the volume of crime in any area is subject to the factors set forth on page *v*. Estimates of current permanent population are used to construct crime rates. With our highly mobile population all communities, metropolitan areas, and states are affected to a greater or lesser degree by the element of transient population. This factor is not accounted for in crime rates since no reliable estimates by state are available nationwide.

Crime trend and rate tables group places according to population size.

National averages are also shown indicating the type and value of the property stolen, by offense and type, and value of the property stolen, by offense and type, and value recovered by police investigation. Robbery, burglary, and larceny-theft are examined by type, as well as where and when they occurred.

Statistical data relating to suburban areas are provided for the use of law enforcement officials in suburban communities in making limited comparisons. Places used to establish totals for suburban areas include cities with less than 50,000 population together with county law enforcement agencies in standard metropolitan statistical areas. Of course, the crime experience of the large core city is excluded.

It is important to remember in studying averages that usually about half the units used must be above and about half below. National averages can provide the law enforcement administrator with valuable guidance in analyzing the local crime count, as well as the performance of his force in combating crime. The analysis, however, does not end with such a comparison, for it is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

[1] Population is Bureau of the Census provisional estimate as of July 1, 1976.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting and crime rates.

[1] Population for each state for 1975 and 1976 is Bureau of Census provisional estimate as of July 1st and subject to change.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Offense totals based on all reporting agencies and estimates for unreported areas.

[4] Includes the District of Columbia.

Divisions and States, 1975–1976—Continued

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

Table 6.—Number of Offenses Known to the Police, 1976, Cities and Towns 10,000 and Over in Population

Individual cities are listed in this table alphabetically by state. Population of each city is designated by group: 1—over 250,000; 2—100,000 to 250,000; 3—50,000 to 100,000; 4—25,000 to 50,000; 5—10,000 to 25,000.

City by State	Population group	Crime Index total	Criminal homicide		Forcible rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—theft	Motor vehicle theft
			Murder and nonnegligent manslaughter	Manslaughter by negligence

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

[4] Includes state police agencies with no county breakdown.

Table 11.—Crime Trends, Offenses Known to the Police, 1975–76, for Suburban and Nonsuburban Cities [1] by Population Group

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Crime offenses include sheriffs' and county police departments. State police offenses are not included.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 17.—Crime Rates, Offenses Known Breakdown, 1976, by Population Groups

[1976 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft		
	Rape by force	Assault to rape—attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles

Miscellaneous	955,400,000	112,120,000	12

[1] All totals and percentages calculated before rounding.

SECTION III

CRIME INDEX OFFENSES CLEARED BY ARREST

Law enforcement agencies clear a crime when they have identified the offender, have sufficient evidence to charge him and actually take him into custody. Crime solutions are also recorded in exceptional instances when some element beyond police control precludes the placing of formal charges against the offender, such as the victim's refusal to prosecute after the offender is identified or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

The nationwide clearance information as reported by law enforcement agencies shows that 21 percent of the Index crimes were cleared during 1976. In 1976 law enforcement agencies cleared 79 percent of the murder offenses, 52 percent of forcible rapes, 63 percent of aggravated assaults, and 27 percent of the robberies. Solutions in the property crime categories showed police cleared 17 percent of the burglaries in 1976, 19 percent of the larceny-thefts, and 14 percent of the motor vehicle thefts. Police are able to clear a higher percentage of the crimes against the person, not only because of the more intense investigative effort afforded these violent crimes requiring police attention, but more importantly, because witnesses are usually available who can identify the perpetrators.

The highest overall Crime Index clearance rate regionally was recorded by the Southern States with 23 percent, followed by the Western and North Central States, each with 21 percent, and the Northeastern States with 17 percent.

Offenses Cleared by Arrest of Juveniles

One means of measuring the involvement of the young-age group in crime is to identify the number of crimes in which they are the offenders. In 1976, 29 percent of all Crime Index offenses solved involved only persons under 18 years of age, while persons 10 to 17 years of age account for about 15 percent of the total United States population.

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

SECTION IV

Persons Arrested

Arrests are primarily a measure of police activity. Arrest practices, policies, and enforcement emphasis will vary from place to place and within a community from time to time. The volume of police arrests for certain unlawful conduct such as drunkenness, disorderly conduct, and certain local ordinances is particularly influenced by the above. On the other hand, robbery, burglary, and other arrests for serious crimes are more likely the result of standard procedures. Arrests are first a measure of police activity as it relates to crime. Arrests do, however, provide a useful index to indicate involvement in criminal acts by the age, sex, and race of the perpetrators, particularly for those crimes which have a high solution rate. Procedures used in this Program require that an arrest be counted on each separate occasion when a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals taken into custody since one person may be arrested several times during the year for the same or different offenses. As noted above, this tends to happen frequently for certain types of offenses against public order such as drunkenness, vagrancy, disorderly conduct, and related violations.

In 1976, law enforcement agencies made an estimated 9.6 million arrests nationally for all criminal acts except traffic offenses. The arrest rate was 45 arrests for each 1,000 persons of our total estimated population for 1976. The arrest rate for cities over 250,000 population was 61 per 1,000 inhabitants, for suburban areas 38, and in the rural areas the arrest rate was 32.

Arrest Trends

In 1976, police arrests for all offenses except traffic decreased 5 percent from 1975. During this time, arrests of persons under 18 years of age decreased 6 percent and arrests of persons 18 years of age and over decreased 4 percent. When only Crime Index offenses are used to compute this trend, there is a 7 percent decrease for all ages.

During the five-year period, 1972–1976, police arrests for all offenses except traffic increased 22 percent, with the arrests of persons under 18 years of age up 23 percent and the arrests of persons 18 years of age and over up 21 percent. When only the Crime Index offenses are used in computing the five-year trend, the increase is 44 percent. Arrests of persons under 18 years of age increased 34 percent while the adult arrests increased 51 percent. Violent crime arrests for persons under 18 years of age increased 28 percent while the property crime arrests increased 35 percent.

Arrests for Narcotic Drug Law violations, 1976 over 1975, decreased less than one percent nationally. From 1972 to 1976, arrests for this violation increased 39 percent. There is set forth a tabulation by geographic region showing the type of narcotic drug involved in the arrest of the offender during 1976.

Arrests for Narcotic Drug Law Violations

[Percent distribution]

	Total	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	19.9	71.4	3.3	5.4
Sale/manufacture	23.3	7.0	13.8	1.0	1.5

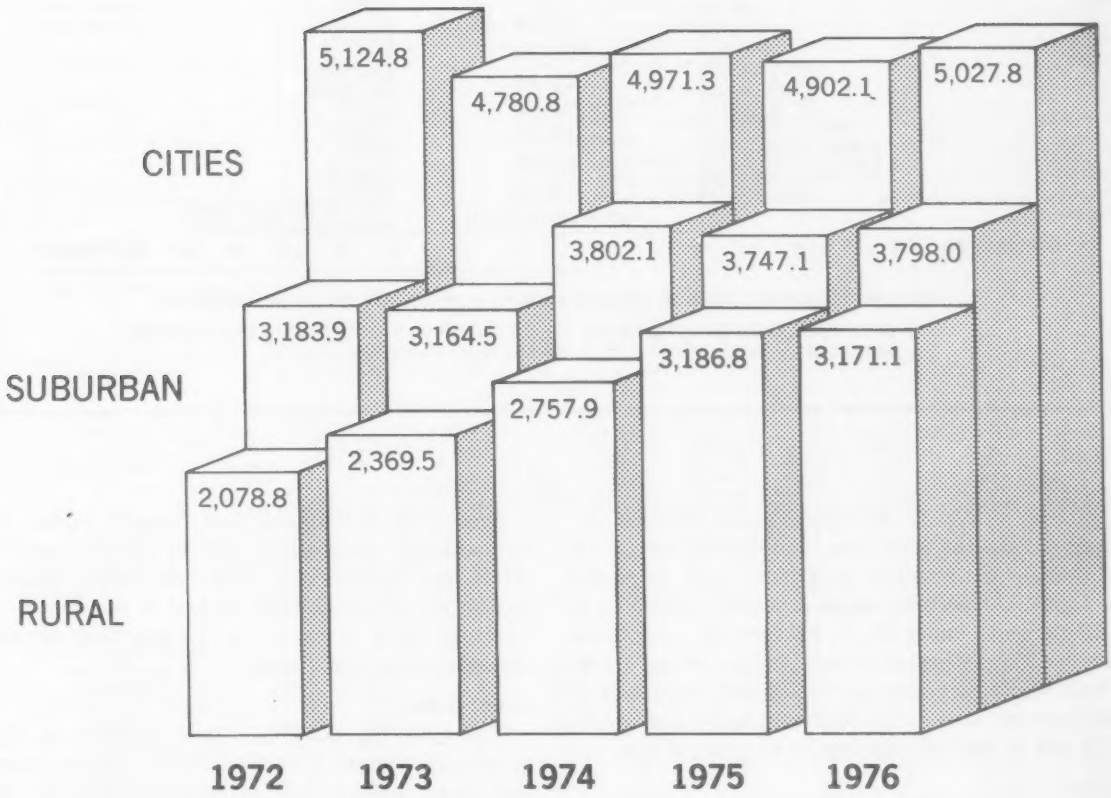
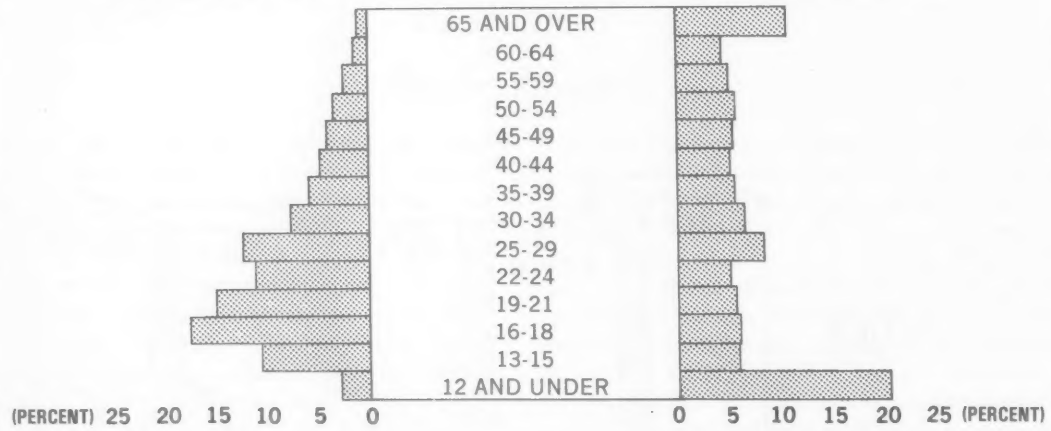
Sale/manufacture	21.0	2.6	13.0	1.3	4.1
Possession	79.0	5.5	65.8	2.1	5.6
Western States	100.0	3.9	62.0	1.6	32.5
Sale/manufacture	57.1	1.1	27.3	.5	28.2
Possession	42.9	2.8	34.7	1.1	4.3
Total	100.0	9.9	72.4	3.0	14.7

Age

Nationally, persons under 15 years of age made up 8 percent of the total arrests; under 18, 25 percent; under 21, 41 percent; and under 25, 57 percent. In the suburban areas the involvement of the young age groups in police arrests is markedly higher than the national figures, with the under 15 age group represented in 10 percent; under 18, 30



ARREST RATE BY AREA, 1972-1976



[1] PERSONS ARRESTED IS BASED ON REPORTS RECEIVED REPRESENTING 175,449,000 POPULATION.

[2] THE TOTAL POPULATION IS 214,659,000 FOR THE U.S., BASED ON BUREAU OF CENSUS PROVISIONAL ESTIMATES, JULY 1, 1976.

percent; under 21, 48 percent; and under 25, 63 percent. In the rural areas the distributions were lower for the younger age groups, with the under 15 group being involved in 3 percent; under 18 in 15 percent; under 21 in 32 percent; and those under 25 in 49 percent of total police arrests. When only the Index crimes are considered, 16 percent of all persons arrested in 1976 were under the age of 15 and 42 percent were under 18 years of age.

Sex

Male arrests outnumbered female arrests by 5 to 1 in 1976. Male arrests in 1976 decreased by 6 percent while female arrests decreased 7 percent. Twenty percent of the arrests for Crime Index offenses were of female persons. Ten percent of the arrests for violent crimes in 1976 involved females. Arrests of females for these types of crimes decreased 1 percent from 1975. Again, as in prior years, their involvement was primarily for larceny which accounted for 23 percent of all female arrests. Females accounted for 31 percent of the embezzlement and 14 percent of the narcotics arrests. Over one-half of the runaway—police custody cases—were females under 18 years of age.

Arrests of both males and females under 18 years of age increased 25 and 16 percent respectively from 1972 to 1976. When the serious crimes as a group are considered, arrests of males under 18, 1972–1976, were up 34 percent and female arrests increased 36 percent.

Arrest Rates

The following table sets forth arrest rates by geographic regions for Crime Index offenses. Arrest rates indicate law enforcement activity in response to crime.

Arrests by Region, 1976

[Rate per 100,000 inhabitants]

Offense	United States Total	Northeastern States	North Central States	Southern States	Western States
Murder	8.0	6.3	6.4	11.7	4.5
Forcible rape	12.4	12.0	9.8	13.7	13.8
Robbery	62.8	84.6	44.6	56.9	67.7
Aggravated assault	109.8	106.3	62.5	135.6	136.9
Burglary	231.8	232.9	170.2	241.5	307.2
Larceny-theft	528.8	423.8	491.9	550.4	692.3
Motor vehicle theft	63.1	65.9	46.4	51.1	115.0
Crime Index total	1,016.8	931.8	831.8	1,061.0	1,337.6

Table 24.—Total Estimated Arrests,[1] United States, 1976

Total[2]	9,608,500	Weapons; carrying, possessing, etc.	147,100
		Prostitution and commercialized vice	70,200
Criminal homicide:		Sex offenses (except forcible rape and prostitution)	62,600
Murder and nonnegligent manslaughter	17,250	Narcotic drug laws	609,700
Manslaughter by negligence	3,310		
Forcible rape	26,400	Opium or cocaine and their derivatives	60,200
Robbery	132,930	Marijuana	441,100
Aggravated assault	235,050	Synthetic or manufactured narcotics	18,200
Burglary—breaking or entering	495,200	Other—dangerous nonnarcotic drugs	90,200
Larceny—theft	1,117,300	Gambling	79,000
Motor vehicle theft	134,400		
		Bookmaking	17,900
Violent crime[2]	411,630	Numbers and lottery	12,700
Property crime[2]	1,746,900	All other gambling	48,400
		Offenses against family and children	72,400
Subtotal for above offenses[2]	2,161,800	Driving under the influence	1,029,300
		Liquor laws	369,700
Other assaults	428,000	Drunkenness	1,297,800
Arson	17,700	Disorderly conduct	657,500
Forgery and counterfeiting	68,000	Vagrancy	39,400
Fraud	199,300	All other offenses (except traffic)	1,619,100
Embezzlement	10,000	Suspicion (not included in total)	37,600
Stolen property; buying, receiving, possessing	111,600	Curfew and loitering law violations	106,300
Vandalism	211,800	Runaways	202,600

[1] Arrest totals based on all reporting agencies and estimates for unreported areas.
[2] Because of rounding, items may not add to totals.

Table 25.—Arrest, Number and Rate, 1976, by Population Groups

Offense charged	Cities								Other areas	
	Total (10,119 agencies; total population 175,499,000)	Total city arrests (7,621 cities; population 122,993,000)	Group I (52 cities over 250,000; population 35,322,000)	Group II (98 cities 100,000 to 250,000; population 13,793,000)	Group III (235 cities 50,000 to 100,000; population 15,677,000)	Group IV (564 cities 25,000 to 50,000; population 18,874,000)	Group V (1,408 cities 10,000 to 25,000; population 21,105,000)	Group VI (5,264 cities under 10,000; population 18,223,000)	Suburban area,[1] (4,286 agencies; population 62,815,000)	Rural area (1,905 agencies; population 24,294,000)

[1] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities also included in other city groups.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 26.—Total Arrest Trends, 1967–1976

[3,035 agencies; 1976 estimated population 94,317,000]

[1] Because of rounding, the percentages may not add to total.
[2] Less than one-tenth of one percent.
[3] Violent crime is offenses of murder, forcible rape, robbery and aggravated assault.
[4] Property crime is offenses of burglary, larceny—theft and motor vehicle theft.

SECTION V

Persons Charged

Disposition data reveals the results of cases in which law enforcement agencies have made an arrest and subsequently formally charged the offender in a court of jurisdiction. This information is important to the law enforcement administrator in evaluating the quality of investigations and court presentation functions.

In 1976, 83 percent of the adults arrested for Crime Index offenses were prosecuted in the courts. Of the adults prosecuted for Crime Index offenses, 66 percent were found guilty as charged and 7 percent of a lesser offense.

It must be recognized that not all arrested persons are turned over to the courts for prosecution. There are various reasons for this: failure of the victim to cooperate or appear for the prosecution, persons arrested are released with a warning, evidence is obtained which discloses the arrested person did not commit the offense, or there is not sufficient evidence available to support either a formal charge or a subsequent prosecution.

For example, four of ten juveniles arrested are handled by the individual law enforcement agencies without preferring a formal charge or referring them directly to juvenile authorities. Tables containing this data commence on the following page. Keep in mind that police methods of handling juvenile offenders differ widely from place to place. Also, the tables concerning juveniles (local age limit) refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal acts.

Forty percent of the persons processed for Crime Index offenses were young persons referred to juvenile court jurisdiction. Similar to prior years, juvenile referrals for motor vehicle theft were significant. Sixty-four percent of those processed for motor vehicle theft were juveniles. Juvenile referrals for burglary were 54 percent, larceny-theft 37 percent, robbery 31 percent, forcible rape 20 percent, aggravated assault 18 percent, and murder 7 percent.

During 1976, as in past years, motor vehicle theft, arson, burglary, and vandalism recorded high percentages of juvenile referrals. When all crime categories are reviewed, it is noted that convictions on original charges remained high in the offenses against public order and decency—driving under the influence, drunkenness, disorderly conduct, and vagrancy. As in prior years, offenses against trust, such as fraud and embezzlement, also recorded a high percentage of convictions on original charges.

Of the adults who were prosecuted for Crime Index offenses, 27 percent were acquitted or their cases were dismissed. In 1976, 37 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Forty-nine percent of those charged with forcible rape were acquitted or had their cases dismissed, and 35 percent of the persons charged with aggravated assault were released either through acquittal or dismissal.

Seventy-three percent of those persons prosecuted for the offense of larceny-theft were found guilty of that offense in 1976. This was followed by burglary with 59 percent found guilty of the original charge, 56 percent for robbery, 48 percent for murder, 53 percent for motor vehicle theft, 52 percent for aggravated assault, and 42 percent for forcible rape.

The offense which had the highest percentage guilty of a lesser offense was murder where 14 percent of the defendants were convicted on some charge other than murder.

• Property crime is offenses of burglary, larceny—theft and motor vehicle theft.

SECTION VI
LAW ENFORCEMENT PERSONNEL

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

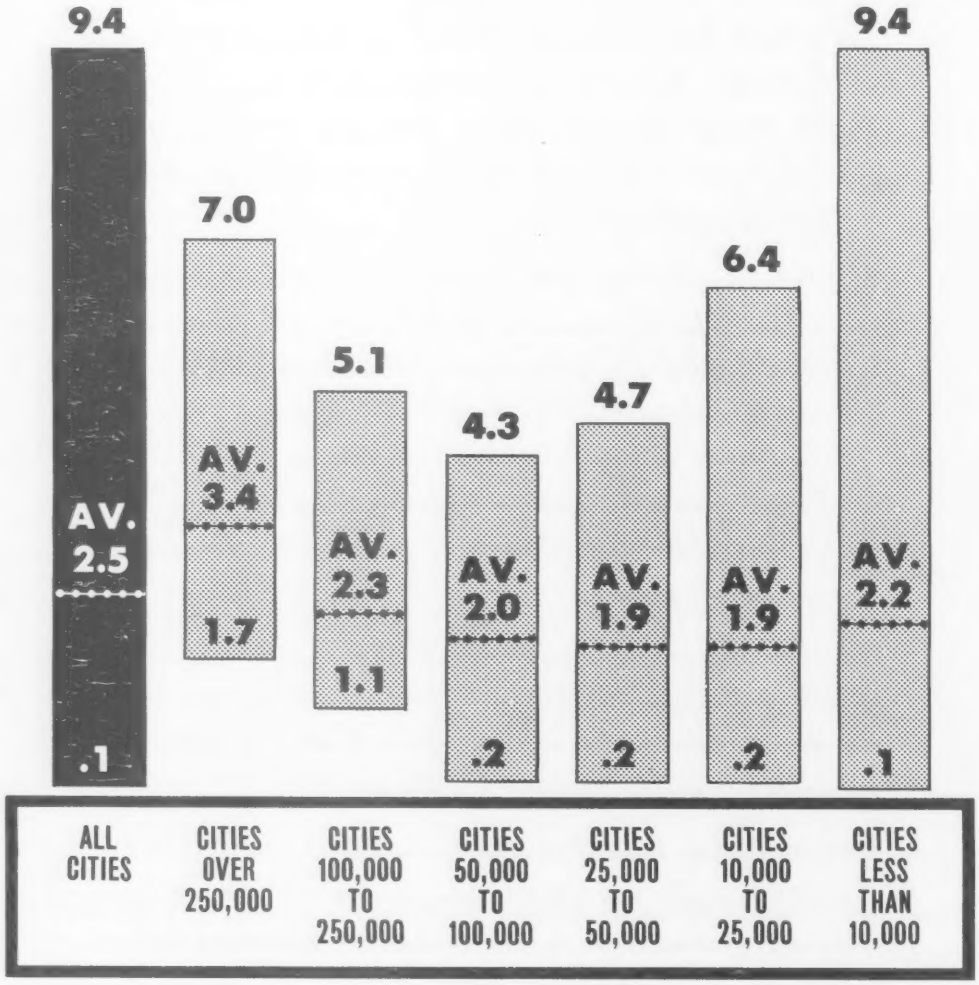
I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

POLICE EMPLOYEE DATA

AVERAGE NUMBER OF POLICE DEPARTMENT EMPLOYEES, AND RANGE IN NUMBER OF EMPLOYEES, PER 1,000 INHABITANTS

BY POPULATION GROUPS, 1976



On October 31, 1976, 10,459 agencies representing over 198 million of the U.S. population reported a total of 418,000 full-time law enforcement officers for a rate of 2.1 officers per 1,000 inhabitants. When full-time civilians were included, the total count of law enforcement employees was 516,000 for a national rate of 2.6 per 1,000 inhabitants.

Caution should be exercised in using rates for comparative purposes since there is a wide variation in the responsibilities of various law enforcement agencies throughout the country. Just as the conditions which affect the amount and type of crime that occurs vary from place to place, so do the requirements for types of police service based upon the conditions which exist in a given community. For example, the increased need for police service in a community which has a highly mobile or seasonal population, differs from a community which has a relatively stable or fixed population. In addition, a small community situated between two large cities may require a greater number of law enforcement personnel than a similarly sized community having no urban centers nearby. The crime conditions of the former are for the most part dictated by its geographic location.

It is pointed out that the figures set forth in detailed police employee tables represent national averages. They should be used as a guide or indicator and not considered as recommended or desirable police strengths. Adequate manpower for a specific place can only be determined after a careful study and analysis of the various factors which contribute to the requirement for police service in that community.

The functions of sheriffs also vary widely in different sections of the country. In certain areas the sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. The sheriffs' departments used in computing rates, however, are all engaged in law enforcement activity and are responsible for all phases of policing in their jurisdiction.

While the ratio of law enforcement personnel to population nationally remains unchanged from the previous year, it is significant to note that many cities in the United States continue to operate with substantially fewer law enforcement employees per capita than the national average. For example, cities in the ten to fifty-thousand population range average 1.9 law enforcement employees per 1,000 inhabitants, unchanged from the year before. This low average rate for smaller cities is offset by the fact that large cities, those with over 250,000 inhabitants, were substantially above the national average with a rate of 3.4 law enforcement employees per 1,000 inhabitants.

Suburban areas averaged 2.2 full-time law enforcement employees per 1,000 inhabitants. Sheriffs' departments had an average rate of 1.9 full-time employees.

The West North Central and West South Central Divisions of the country recorded the fewest (2.1) law enforcement employees per 1,000 population while the Middle Atlantic and South Atlantic states continued as the Nation's leaders in the rate of law enforcement employees to population. The Middle Atlantic states dropped to 2.7 from their rate of 2.9 the year before while the South Atlantic states also dropped during the year a tenth of a point to 3.0 employees.

Sworn Personnel

Law enforcement employee rates based on sworn personnel only (excluding civilian employees) show that the average for all cities was 2.0 per 1,000 inhabitants in 1976. The city rates, nationally, range from 0.1 to 7.7 per 1,000 inhabitants. In city agencies, males represented 98 percent of all sworn personnel, while males in suburban agencies constituted 96 percent and in county sheriff and police departments 92 percent. The average rate of sworn employees in sheriffs' departments was 1.5 per 1,000 inhabitants and the rate range for the 2,656 reporting county agencies was 0.1 to 10.8 per 1,000 inhabitants.

Civilian Employees

On the average during 1976, 16.5 percent of all city law enforcement personnel were civilian employees. The proportion of civilian employees in law enforcement agencies is recognition of the fact that they can be used effectively to free sworn officers for more imperative police duties.

Table 61.—Civilian Law Enforcement Employees, October 31, 1976, Percentage of Total by Population Groups

ASSAULTS ON LAW ENFORCEMENT OFFICERS

Assaults on law enforcement officers are collected on a detailed monthly basis in the Uniform Crime Reporting Program to show the problem of assaults to local, county, and state law enforcement officers in the Nation.

During 1976, 49,079 assaults on police were reported by 7,665 agencies covering an estimated population of 156,085,000. The rate of assaults on law enforcement officers for the Nation was 17 assaults per 100 officers for the year.

Injuries to Law Enforcement Officers

Assaults on officers resulted in nearly 19,000 cases of personal injury. The rates (Table 68) showed assault with injury to 11 officers per 100 in the New England division as contrasted with 5 per 100 in four of the other divisions. The national rate of injuries to law enforcement officers was 6 per 100 officers. Cities over 100,000 inhabitants had the greatest rate of assault with injury with 9 per 100 and sheriffs' and county police departments had the lowest rate with 4 per 100.

Table 68.—Law Enforcement Officers Assaulted, 1976, Geographic Divisions and Population Groups

[1] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.

Weapons Used in Assaults on Law Enforcement Officers

The distribution of weapons used to assault officers is shown by geographic division, population group, and type of activity in Tables 69 and 70. Nationwide, personal weapons such as hands, fists, feet, etc., were used in 82 percent of the assaults on officers in 1976. Firearms were used in 6 percent of the assaults, knives or cutting instruments in 3 percent, and other weapons in 10 percent of the assaults on law enforcement officers.

Time of Assault

Assaults on officers by time and population group are set forth in Table 72. Approximately one-half of the assaults on officers occurred during the hours from 8:00 p.m. to 2:00 a.m. The period with greatest incidence was from 10:00 p.m. to midnight. Eighteen percent of the assaults were recorded during this two-hour period.

Activity of Law Enforcement Officers at the Time of Assault

An examination of the activities of law enforcement officers at the time of the assaults (Table 71) discloses that the greatest number of assaults, 31 percent, were in responding to disturbance calls. The second highest incidence activity, 21 percent of the assaults, was attempting arrests other than for burglary or robbery.

Type of Assignment

Table 74 shows the type of assignment of the officer assaulted. Thirty-seven percent were in two-officer vehicles, 43 percent were in one-officer vehicles, 6 percent were on detective or special assignment, and 13 percent were on other assignments. Of all assaults on police, the vehicle patrol officer was the victim in 80 percent of the cases.

Clearances of Assaults on Law Enforcement Officers

Nationwide in 1976, 92 percent of law enforcement assaults were cleared by arrest. Cities over 250,000 and those from 50,000 to 100,000 had the highest clearance percentage with nearly 94 percent being cleared. Assaults in disturbance matters were cleared at the rate of 96 percent in the cities over 250,000.

By activity, the highest clearance rate for all agencies was the 93 percent recorded in assaults on officers responding to disturbance calls and attempting arrests other than for robbery or burglary. Ambush attacks accounted for the lowest clearance rate with 57 percent. Table 75 shows the percentage of assaults cleared by type of activity and population group.

LAW ENFORCEMENT OFFICERS KILLED

In 1976, 111 local, county, state, and Federal law enforcement officers were killed due to felonious criminal action in the United States, Puerto Rico, and abroad. During the ten-year period 1967–1976, 1,077 officers were killed. The number of law enforcement officers killed in Puerto Rico for the period 1971–1976 and the number of Federal officers killed in the period 1972–1976 have been included in the tabulations with the local, county, and state officers for the ten-year period.

Year:	*Number of victim officers*
1967	76
1968	64
1969	86
1970	100
1971	129
1972	116

1974	132
1975	129
1976	111

Geographic Locations

In 1976, 57 officers were slain in the Southern States, 24 in the North Central States, 15 in the Northeastern States, and 10 in the Western States. The preceding chart shows the number of law enforcement officers killed by region for each of the two five-year periods, 1967–1971 and 1972–1976. An accompanying table shows the officers feloniously killed in 1976 by geographic division and population grouping.

One hundred and six of the 111 officers slain during 1976 were from 90 different local, county, and state law enforcement agencies in 34 states and the District of Columbia. Four officers were killed in Puerto Rico and one Federal officer was also killed.

Among the states, Texas ranked highest with twelve officers killed. The State of Florida followed with seven officers slain.

Circumstances Surrounding Deaths

There were more law enforcement officers killed attempting arrests than in any other circumstance in 1976. This trend was established in prior years and continues as one of the most dangerous situations the police officer faces today. Twenty-five officers were killed while attempting arrests for crimes other than robbery or burglary. In connection with robbery offenses, 15 officers were slain by persons encountered during the commission of a robbery or during the pursuit of robbery suspects. Nine officers were killed at the scene of burglaries or while pursuing burglary suspects.

In 1976, 13 officers were killed in ambush situations. Five of these officers were victims of unprovoked attacks which did not involve any apparent element of entrapment. The other eight officers were slain in premeditated attacks.

Twenty officers were slain in 1976 responding to disturbance calls. Included in disturbance calls are family quarrels, man with gun, bar fights, etc. Eleven officers were killed while investigating suspicious persons or circumstances, ten officers were slain while making traffic stops, four were killed while handling mentally deranged persons, and four officers were killed while transporting or otherwise engaged in custody of prisoners.

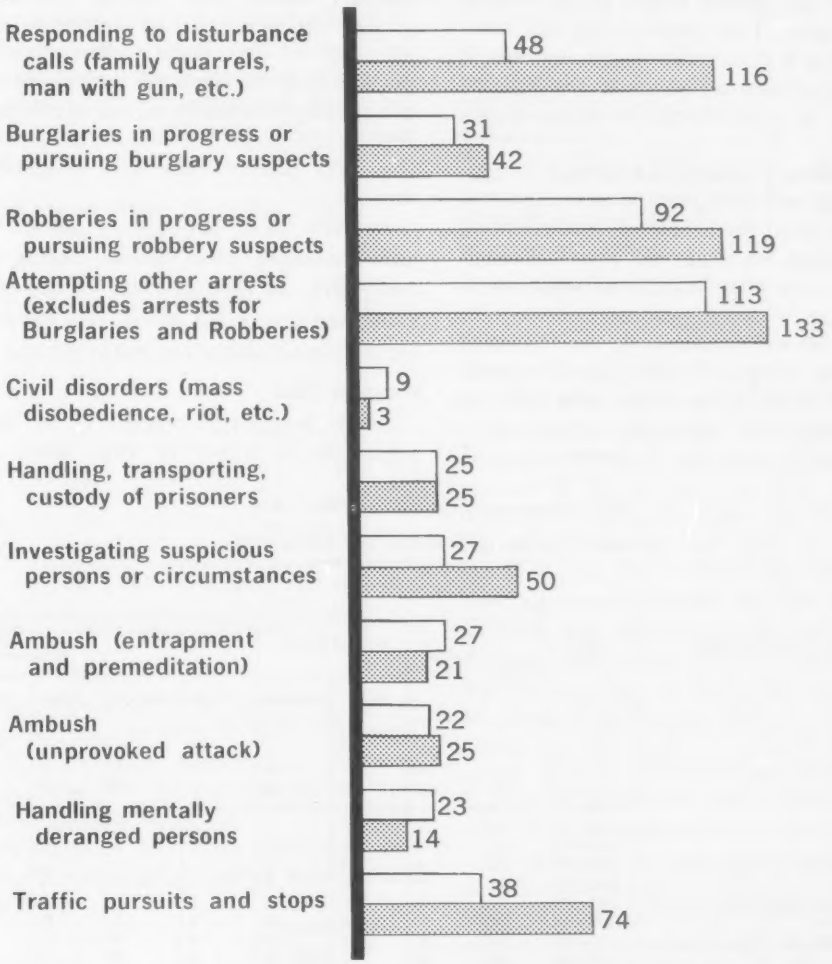
SITUATIONS IN WHICH LAW ENFORCEMENT OFFICERS WERE KILLED

1967-1976



Types of Assignment

Patrol duties within law enforcement organizations are the most hazardous type of assignment for officers. The patrol officer is frequently in contact with suspicious or dangerous individuals during the course of these duties and each of these situations constitutes a threat to the officer's personal safety. The patrol officer is readily identifiable because of his uniform and/or patrol vehicle. He frequently must determine quickly and accurately if a person is involved in a criminal act. If the suspect constitutes a danger to the officer's personal safety, he must afford himself reasonable protection.

The patrol officer is placed in a variety of dangerous situations and must react to circumstances as they occur without the benefit of detailed information or planning. He often risks attack through frequent encounters with criminal offenders at or near crime scenes.

These perils are substantiated by the fact that officers assigned to patrol duty are the most frequent targets of the police killer. Law enforcement officers assigned in other capacities are confronted with equally tense and dangerous types of situations while performing their duties but not with the same frequency.

Sixty-seven patrol officers were slain in 1976. Sixty-six of these officers were assigned to patrol vehicles and one was on foot patrol. Twenty-seven officers were detectives or officers on special assignments. In the highest tradition of the law enforcement profession, 17 officers, while in an off-duty status, were taking appropriate police action relative to criminal matters when they were slain. Six of the off-duty officers were killed by persons they encountered during the commission of a robbery or while in pursuit of robbery suspects. During the period 1967–1976, 66 percent (714) of the 1,077 officers slain were assigned to patrol duties.

In 1976, 33 of the on-duty officers were alone and unassisted when killed. During the period 1967–1976, 34 percent (368) of the officers were alone and unassisted when they gave their lives for the communities they were sworn to protect.

Weapons Used

Ninety-four, or 85 percent, of the law enforcement officers killed in 1976 were slain with

firearms. Handguns were used in 66 of these deaths, rifles in 12, and shotguns were used to kill 16 of the officers. Fifteen officers were slain with their own firearms. The remaining 17 officers not slain with firearms were killed through the use of the following: five officers were slain with knives, five with automobiles, four with bombs, two with clubs, and one died in a fire.

Fifty-four of the officers killed in 1976 utilized their service firearms while in contact with their assailants. Thirty-one of these officers discharged their service firearms while attempting to protect themselves. Forty-eight percent (53) of the officers killed by firearms were within five feet of their assailants at the time they were shot.

Day and Hour of Attack

As the accompanying data shows, it cannot be said any one day or time is extremely more hazardous to a law enforcement officer than any other day or time. The data points out the fact an officer must be constantly alert.

The following table shows the number of law enforcement officers killed by day of week for the period 1967–1976.

Day of week:	*Number of victim officers*
Monday	153
Tuesday	138
Wednesday	137
Thursday	157
Friday	175
Saturday	161
Sunday	156

Profile of Victim Officers

Ninety percent of the officers slain during 1976 were white, eight percent were Negro, and two percent were of other races. The median year of service was five and one-half. Thirteen percent of the officers killed had one year or less of law enforcement service. Forty-three percent had less than five years of service, 28 percent had five through ten years of service, and 29 percent had more than ten years service as law enforcement officers.

Profile of Victim Officers

Law enforcement officers	1967–76	1967–71	1972–76
Percent white	88	84	90
Percent Negro	11	15	9
Percent other race	1	1	1
Median years of service	5	5	5
Percent with 1 year or less service	11	12	11
Percent with less than 5 years service	41	40	41
Percent with 5 through 10 years of service	25	24	25
Percent over 10 years of service	23	24	22

Persons Identified

Law enforcement agencies cleared 110 of the 111 killings that occurred in calendar year 1976. One hundred and fifty-four persons were identified in connection with these crimes. Fifty-four percent of the persons identified were white, 43 percent Negro, and three percent other races. Sixty percent of the persons had prior arrests, and 44 percent of the individuals had been convicted. Twenty-five percent had prior arrests for violent types of crime such as murder, rape, armed robbery, aggravated assault, etc. Forty-three percent of those who had previously been convicted on criminal charges were granted parole or probation. Twenty-three percent of the persons identified were on parole or probation when an officer was killed. Eighteen percent of the individuals had a prior arrest for a narcotics charge, and four percent had prior arrests for police assault. Ninety-four percent were male and six percent female.

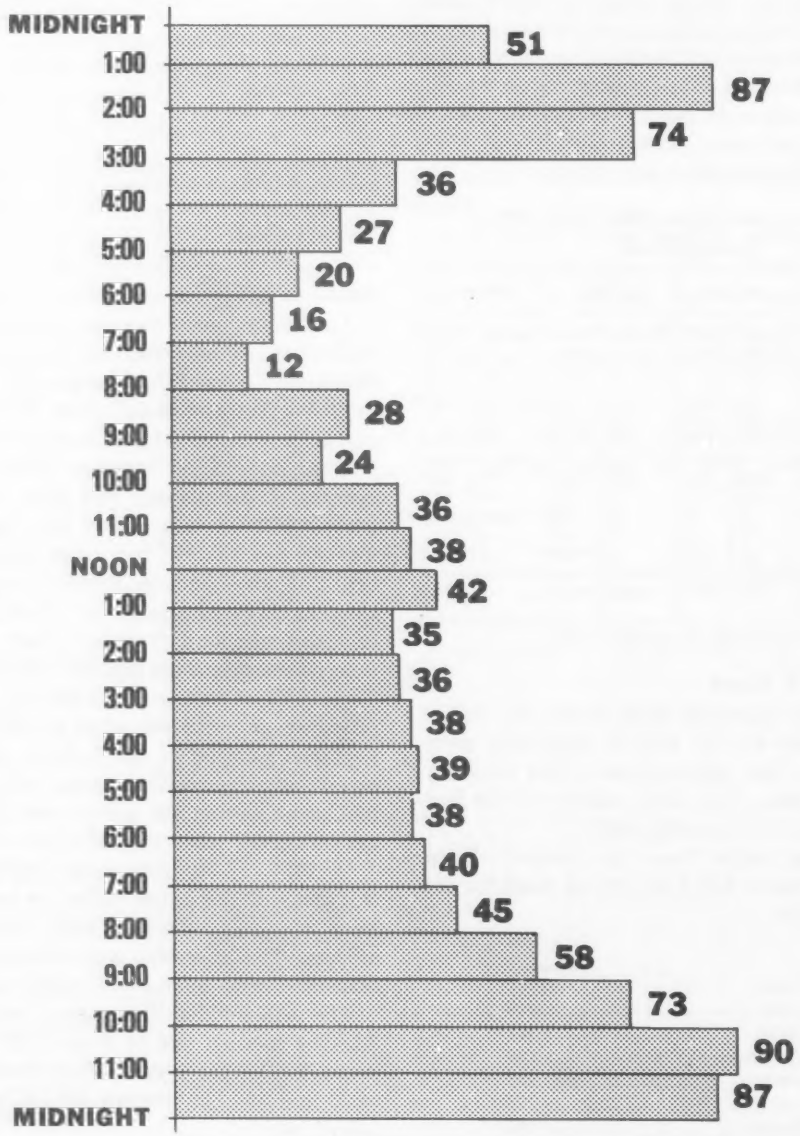
In 1976, 17 subjects were justifiably killed at the scene of the police killing or soon thereafter. Four of these offenders were killed by victim officers. Ten offenders were wounded by victim officers. Seven offenders committed suicide.

The persons identified ranged in age from 15 to 76. The median age of these individuals was 25 years. Forty-five percent were between the ages of 20 and 30. Ten percent (or 16) were under the age of 18.

In the period 1965–1974, which is the most recent ten-year period for which complete data is available, 1,337 known persons were involved in connection with the killing of 947 law enforce-

LAW ENFORCEMENT OFFICERS KILLED
Hour of Day

1967-1976



The hour of the day in which seven officers were killed is not known.

Profile of Persons Identified

Persons Identified	Total	Percent of persons identified [1]	1967–1971	Percent	1972–1976	Percent
Total	1,526	100	626	100	900	100
Under age 18	105	7	35	6	70	8
From 20 to 30 years of age	816	53	345	55	471	52
Male	1,468	96	599	96	869	97
Female	58	4	27	4	31	3
White	729	48	278	44	451	50
Negro	777	51	346	55	431	48
Other race	20	1	2	.....	18	2
Prior criminal arrest	1,134	74	480	77	654	73
Convicted on prior criminal charge	836	55	363	58	473	53
Prior arrest for crime of violence	586	38	271	43	315	35
Convicted on criminal charges—granted leniency	569	37	216	35	353	39
On parole or probation at time of killing	251	16	89	14	162	18
Arrested on prior murder charge	61	4	18	3	43	5
Prior arrest on narcotic drug law violation	254	17	86	14	168	19
Prior arrest for assaulting policeman or resisting arrest	130	9	63	10	67	7
Prior arrest for weapons violation	323	21	133	21	190	21

[1] Due to rounding, the percentages do not add to totals.

ment officers. One thousand one hundred and fourteen of these individuals were arrested and charged in connection with the killings of the officers. Available court disposition data regarding the offense related to the officers' deaths disclose that 90 offenders were sentenced to death, 349 were sentenced to life imprisonment, 236 received prisons terms ranging from one to 2,001 years, five offenders received probation, one offender received a suspended sentence, and the sentences for ten offenders were unknown.

Disposition of Persons Identified in the Killing of Law Enforcement Officers, 1965–1974

	Total	Percent distribution [1]
Known persons	1,337	100
Fugitives	15	1
Justifiably killed	175	13
Committed suicide	33	2
Arrested and charged	1,114	83
Arrested and charged	1,114	100
Guilty of murder	691	62
Guilty of lesser offense related to murder	96	9
Guilty of crime other than murder	89	8
Acquitted or otherwise dismissed	154	14
Committed to mental institution	40	4
Case pending	33	3
Died in custody	11	1

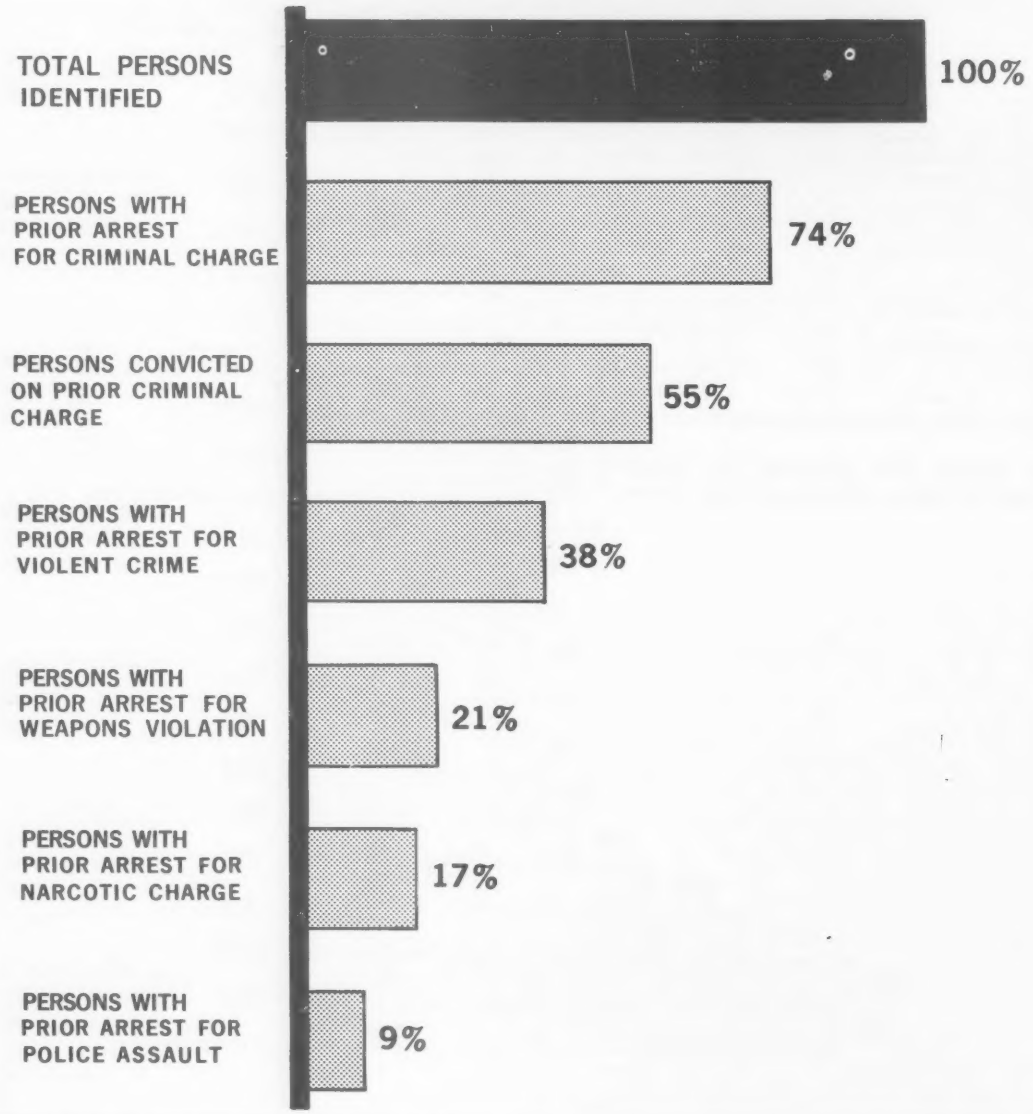
CRIMINAL HISTORY OF 1,526 PERSONS IDENTIFIED IN THE KILLING OF LAW ENFORCEMENT OFFICERS

PERCENT OF TOTAL PERSONS IDENTIFIED
1967-1976



SECTION VII

Appendix I

Table Methodology

This appendix is to assist the more-than-casual reader in understanding the various tables presented regarding crime-related information. Each table within this publication is constructed to provide as much information as is available. By utilizing the following key in conjunction with the pages that follow, an individual interested in a specific table, will gain a better understanding of table construction.

Key: A) Column 1 indicates the table number. This appendix will refer to Tables 1 through 57, "Crime in the United States—1976."

B) Column 2 indicates the type of crime statistics presented. Four distinct types of crime-related data are submitted to UCR by law enforcement agencies:

1. offense (o)
2. clearance (c)
3. arrest (a)
4. disposition (d)

C) Column 3 indicates the reporting period for the data. Depending on data collected, submission of data is either by monthly (M) or annual (A) reports.

D) Column 4 indicates level of submission necessary for an agency's statistics to be included in table aggregations. Data tables result from the submissions of three levels of agency participation.

1) Agencies having reported data for all twelve months of the year.
2) Agencies reporting for less than twelve months of the year.
3) Non-reporting agencies.

This column indicates that the statistics from each agency level are, or are not, included in the table(s). For example, Table 1 includes data from all three agency reporting levels, but Table 14 presents only the data from agencies reporting for the entire year.

E) Column 5 indicates individual table construction. Data adjustments, if any, are discussed along with various definitions of data aggregation.

F) Column 6 indicates general comments regarding potential use and misuse of the statistics presented.

G) Column 7 indicates the percent of total United States population represented in each table or family of tables. The number of contributing agencies also vary among tables. Therefore, the percentage of potentially useable agencies is presented. For example, Table 1 represents national level statistics for all agencies serving 215 million population, while Table 56 statistics are compiled from a more limited group of agencies representing 34 million population.

242-856 O - 77 - 20

(1)	(2)	(3)	Data base (4)	Table construction (5)	General comments (6)	Table representation (7)		
							Agency percent	Population percent
1	o	M	All law enforcement agencies in the UCR Program (including those submitting less than twelve months for 1976).	Table statistics are aggregated from individual state statistics as shown in Table 4. Crime statistics include estimated offense totals for agencies submitting less than twelve months of offense reports. Population statistics represent July 1, 1976 estimation. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1976.	1		
						SMSA	100.0	100.0
						Other	100.0	100.0
						Rural	100.0	100.0
2	o	M	All law enforcement agencies in the UCR Program (including those submitting less than twleve months for 1976).	The 1976 table statistics are consistent with Table I, *Crime in the U.S.* Pre-1976 crime statistics are subject to updating and, hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than twelve months of offense reports for 1976. Population statistics represent July 1, estimations for each year. The tabular breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded off to the tenth place for violent crime and one hundredth place for property crimes.	Represents an estimation of national reported crime activity from 1967 to 1976.	2		
						SMSA	100.0	100.0
						Other	100.0	100.0
						Rural	100.0	100.0
3	o	M	All law enforcement agencies in the UCR Program (including those submitting less than twelve months for 1976).	The 1976 table statistics are aggregated from individual state statistics as shown in Table 4. Prior crime statistics are subject to updating. Crime statistics include estimated offense totals for agencies submitting less than twelve months of offense reports for 1976. Population statistics represent July 1, estimations for each year. The tabular breakdowns are according to UCR crime definitions (App. II).	Represents estimation of reported crime activity for all index offenses of: 1. National level 2. Regional level 3. Division level 4. State level Any comparison of UCR statistics should take into consideration potential demographic differences.			
4	o	M	All law enforcement agencies in the UCR Program (including those submitting less than twelve months for 1976).	Crime statistics include estimated offense totals for agencies submitting less than twelve months of offense reports. Population statistics represent July 1, 1976, population estimations. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all twelve months of offense reports and estimated totals for agencies submitting less than twelve, but more than two months of offense reports. The statistics under the heading "Estimated Totals" represented the above plus estimated offense totals for agencies having less than three months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents estimation of reported crime activity for all index offenses at state level. Any comparison of UCR statistics should take into consideration potential demographic differences.	4		
						SMSA	100.0	100.0
						Other	100.0	100.0
						Rural	100.0	100.0

(1)	(2)	(3)	Data base (4)	Table construction (5)	General comments (6)	Table representation (7)		
							Agency percent	Population percent
5	o	M	All law enforcement agencies in the UCR Program (including those submitting less than twelve months for 1976).	Statistics are published for all Standard Metropolitan Statistical Areas (SMSA) having at least 75% reporting. Crime statistics include estimated offense totals for agencies submitting less than twelve months of offense statistics for 1976. Population statistics represent July 1, 1976, estimates. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all twelve months of offense reports plus estimated offense totals for agencies submitting less than twelve, but more than two months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than three months of offense reports. The tabular breakdowns are according to UCR definitions (App. II).	Represents estimation of the reported crime activity for all index offenses at individual SMSA level. Any comparison of UCR statistics should take into consideration potential demographic differences.			
6	o	M	All law enforcement agencies submitting complete reports for all months in 1976.	"Cities and Towns" are defined to be agencies with population groups I through V (App. III). The population classification of agencies is based on July 1, 1976, population estimations of each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparisons of UCR statistics should take into consideration potential demographic differences.			
7	o	M	All law enforcement agencies submitting complete reports for all months in 1976.	University and college law enforcement agencies.	Represents reported crime of individual university and college police agencies.			
8	o	M	All law enforcement agencies submitting complete reports for all months in 1976.	"Suburban Counties" are defined to be all noncity agencies within an SMSA (App. III).	Represent crime reported to individual police agencies in suburban counties. Any comparison of UCR statistics should take into consideration potential demographic differences.			
9	o	M	All law enforcement agencies submitting complete reports for all months in 1976.	"Rural Counties" are defined to be that portion not covered by city police agencies and outside SMSA's (App. III). population classifications of rural counties are based on July 1, 1976, population estimations of individual agencies.	Represents crime reported to individual police agencies in rural counties over 25,000 population. Any comparison of UCR statistics should take into consideration potential demographic differences.			

(1)	(2)	(3)	Data base (4)	Table construction (5)	General comments (6)	Table representation (7)		
							Agency percent	Population percent
10	o	M	All law enforcement agencies submitting complete reports for at least six common months in 1975 and 1976.	The 1976 crime trend statistics are one year comparisons based on 1976 reported crime activity. Only common reported months for individual agencies are included in 1976 trend calculations. Populations represent July 1, 1976, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban Cities" represent all city agencies other than core cities for SMSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.	10		
11						SMSA	76.7	93.1
12						Other	77.0	97.6
13						Rural	65.5	78.2
						13

						Other	77.0	97.6
						Rural	65.5	78.2
14	o	M	All law enforcement agencies submitting complete reports for all months in 1976.	The 1976 crime rates are the ratios of the aggregated 1976 crime volumes and the aggregated 1976 populations of the contributing agencies. Population statistics represent July 1, 1976, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Non-Suburban" represents all city agencies other than core cities for SMSAs.	Slight decrease in national coverage for Table 17 due to verification procedure and lower submission rate.	14		
15						SMSA	75.1	92.0

(1)	(2)	(3)	Data base (4)	Table construction (5)	General comments (6)	Table representation (7)		
							Agency percent	Population percent
20	o	M	All law enforcement agencies submitting complete reports for at least six months in 1976.	The 1976 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1976. Population statistics represent July 1, 1976, estimations of individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	Differences in clearance rates between crime offenses are often due to nature of crime.	20		
21

						Rural	59.9	73.3
24	a	M	All law enforcement agencies.	The arrest totals presented are national estimates based on the arrest statistics of agencies reporting at least six months in 1976. An equivalent population is used when six through eleven months are used. The Total Estimated Arrests statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (see App. III). Each group estimate is the reported volume (as shown in Table 29) divided by the percent total group population reporting (as estimated for July 1, 1976). For example, in the Rural Area, agencies having reported six or more months represent 41,740 Burglary arrests and 74.9% of the total rural population. The rural Burglary arrest total, Eb, is estimated to be: $Eb = \frac{\text{Reported volume}}{\% \text{ population}} \times 100$ $Eb = \frac{41{,}740}{.749} \times 100 = 55{,}700$		24		
						SMSA	100.0	100.0

Appendix II

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II offenses. Crime Index offenses are included among the Part I offenses. Offense and arrest information is reported for the Part I offenses on a monthly basis, whereas only arrest information is reported for Part II offenses.

The Part I offenses are as follows:

1. **Criminal homicide.**—(a) Murder and nonnegligent manslaughter: All willful felonious homicides as distinguished from deaths caused by negligence. Excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides are limited to: (1) The killing of a person by a law enforcement officer in line of duty; and (2) The killing of a person in the act of committing a felony by a private citizen. (b) Manslaughter by negligence: Any death which the police investigation established was primarily attributable to gross negligence of some individual other than the victim.

2. **Forcible rape.**—The carnal knowledge of a female, forcibly and against her will in the categories of rape by force, assault to rape, and attempted rape. Excludes statutory offenses (no force used—victim under age of consent).

3. **Robbery.**—Stealing or taking anything of value from the care, custody, or control of a person by force or by violence or by putting in fear, such as strong-arm robbery, stickups, armed robbery, assaults to rob, and attempts to rob.

4. **Aggravated assault.**—Assault with intent to kill or for the purpose of inflicting severe bodily injury by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids, explosives, or other means. Excludes simple assaults.

5. **Burglary—breaking or entering.**—Burglary, housebreaking, safecracking, or any breaking or unlawful entry of a structure with the intent to commit a felony or a theft. Includes attempted forcible entry.

6. **Larceny-theft (except motor vehicle theft).**—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Excludes embezzlement, "con" games, forgery, worthless checks, etc.

7. **Motor vehicle theft.**—Unlawful taking or stealing or attempted theft of a motor vehicle. A motor vehicle is a self-propelled vehicle that travels on the surface but not on rails. Specifically excluded from this category are motor boats, construction equipment, airplanes, and farming equipment.

The Part II offenses are:

8. **Other assaults (simple).**—Assaults which are not of an aggravated nature.

9. **Arson.**—Willful or malicious burning with or without intent to defraud. Includes attempts.

10. **Forgery and counterfeiting.**—Making, altering, uttering or possessing, with intent to defraud, anything false which is made to appear true. Includes attempts.

11. **Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks except forgeries and counterfeiting. Also includes larceny by bailee.

12. **Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property and attempts.

14. **Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of property without consent of the owner or person having custody or control.

15. **Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and

manufacturing of deadly weapons or silencers. Includes attempts.

16. **Prostitution and commercialized vice.**—Sex offenses of a commercialized nature and attempts, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape, offenses against chastity, common decency, morals, and the like. Includes attempts.

18. **Narcotic drug laws.**—Offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

19. **Gambling.**—Promoting, permitting, or engaging in illegal gambling.

20. **Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**—Driving or operating any motor vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**—State or local liquor law violations, except "drunkenness" (class 23) and "driving under the influence" (class 21). Excludes Federal violations.

23. **Drunkenness.**—Drunkenness or intoxication.

24. **Disorderly conduct.**—Breach of the peace.

25. **Vagrancy.**—Vagabondage, begging, loitering, etc.

26. **All other offenses.**—All violations of state or local laws, except class 1–25 and traffic.

27. **Suspicion.**—Arrests for no specific offense and released without formal charges being placed.

28. **Curfew and loitering laws (juveniles).**—Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. **Runaway (juveniles).**—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

Appendix III

Uniform Crime Reporting Population Definitions

In this publication, data are generally presented in population groupings established by the Bureau of the Census. Eight major population groups are shown below:

Group	Political label	Population coverage
I	City	Over 250,000.
II	City	100,000 to 250,000.
III	City	50,000 to 100,000.
IV	City	25,000 to 50,000.
V	City	10,000 to 25,000.
VI	City	Less than 10,000.
VIII	Rural county	
IX	Suburban county	

The major source of Uniform Crime Reporting (UCR) data is the individual police agency; therefore, some population and geographical aggregations may differ from standard Census definitions to render them consistent to police reporting areas and jurisdictions. UCR employs standard city and Standard Metropolitan Statistical Areas (SMSA) classifications from the Bureau of the Census, but rural and suburban areas are slightly changed to match the reporting area of the local police.

Rural Areas, *Other Cities*, and *SMSA Area* represents a structure of presentation often used in this publication. These three areas are mutually exclusive and exhaustive.

The *Rural Area* is that portion of a county outside the SMSA and excluding areas covered by city police agencies.

Other Cities are urban places outside the SMSA, most are incorporated.

The *SMSA Area* represents all agencies within Standard Metropolitan Statistical Area.

Suburban Area refers to cities with less than 50,000 inhabitants plus counties within an SMSA (excluding the central city).

The number of full-service law enforcement agencies serving the population groups will slightly vary from year to year. This phenomena is caused through geo-political consolidation, municipal incorporation, etc. The following list shows the number of agencies within each population group.

Population group	Number of agencies	Population
I	59	42,407,000
II	110	15,711,000
III	278	19,144,000
IV	639	22,039,000
V	1,566	22,647,000
VI	6,827	23,647,000
VIII	2,730	32,449,000
IX	865	35,843,000
